Schnebly Coulee Solar Energy Project

Water Rights Retention Plan

Schnebly Coulee Solar Energy LLC (the Applicant) submits this water rights retention plan as part of the conditional use permit application for the proposed Schnebly Coulee Solar Energy Project (Project) located just east of Stevens Road. This plan is submitted in accordance with Kittitas County Code 17.61C.070 (7).

The Project is situated within approximately 1,300 acres of leased land, none of which has water rights. The Applicant does not plan on obtaining any water rights that might exist off-site nor does it plan on obtaining new water rights. Water will be required during construction of the Project for dust control, but this will be purchased on a temporary basis from a nearby source.
