Subject: RE: SD-25-00001 Easton Research and Rearing Facility Outfall - Notice of Application, SP3801 and SP013C

CAUTION: This email originated from outside the Kittitas County network. Do not click links, open attachments, fulfill requests, or follow guidance unless you recognize the sender and have verified the content is safe.

Melissa and Ellie:

Based on a better understanding of this application's ideas, DOH provides this email to summarize status of possible water system or well uses.

In the vicinity of this applicant's property are two public drinking water systems, both having a single, approved well, and showing the following:

- Lake Easton State Park East (SP3801) – Active: 20, Approved: 34
- Lake Easton State Park West (SP013C) – Active: 58, Approved: 0

So, if the applicant wants to connect to one of these systems, please consider the following:

- To connect to the “East” park, this system has connection availability. For the “connection”, DOH requires submittal of the design of the interconnecting piping and an estimate of the water use by the applicant's facility.
- To connect to the “West” park, this system currently has no available connections, but that is because its “capacity” was never evaluated. To connect, DOH requires completion of a capacity analysis of the “West” park system, including estimated water usage by the applicant's facility, and if this capacity analysis shows sufficient capacity, then submit of the design of the interconnecting piping.

For any design submittals and for any capacity analysis calculations, DOH requires these to be prepared by a Professional Engineer licensed in the State of Washington.

Additionally, the applicant had considered another well with a well tag “AFT387” – this well is not an approved well, so the applicant would need to complete source approval and complete a new water system application (both required to be completed by a Professional Engineer licensed in the State of Washington); however, as noted in my original email below, the applicant needs to answer that set of questions so that we can determine if, as a standalone entity, it meets the definition of either a Group A or Group B water system.

If anyone has any questions or seeks further clarification, please contact me, thanks,

Russell E. Mau, PhD, PE

External Email

Ellie and Russell,

I have already been in contact with the individuals in charge of this project. If they choose to use another well with Lake Easton State Park, then they will reach out to get that source approved if it can be. Otherwise, they are looking into connecting into Lake Easton "East" well.

Russell, this is the connection that I was referring to when I send over the tag number for the existing well that we didn't have any information for inside the Lake Easton State Park. That initial well isn't usable yet. I am so sorry you reviewed something that was already in progress.

Regards,

Melissa Schumaier BS REHS/RS

Ms. Myers:

The Department of Health (DOH) Office of Drinking Water (ODW) has reviewed the application and has the following official comments:

1. The applicant proposes a new groundwater well to provide water, for “drinking” water uses, within the proposed building – DOH ODW seeks the following information:
 - Is the proposed property within the service area of the “Easton Water District” (ID #42700)?
 - What is the number of persons who will be on-site per day and per month?

Depending on responses to these questions, DOH ODW will provide additional guidance.

If anyone has any questions or concerns, please contact DOH ODW, thanks,

Good morning,

This email is to correct the comment deadline stated in our previous message regarding the Shoreline Substantial Development application SD-25-00001 ERRF Outfall. Any comments need to be received by **5 PM on November 3, 2025**.

I apologize for any confusion and appreciate your time spent reviewing this project.

Best,

Ellie Myers
