Hi Jeanne,

Archeologist approval 

I heard back from the archaeologist on Friday, she was able to clear the project to move forward as not likely to affect cultural resources. I will be sending the notification letter in the mail today and it is also attached here. Our engineer still needs to make his measurements on 9/24 and provide quantity calculations after that, but you should be able to proceed at the end of October.

Please note that this clearance only applies to the location and extent of practices as planned. You would need to obtain new clearance if location or deeper disturbance is needed. I will also send an inadvertent discoveries letter for electronic signature.

Thank you,

Holly Taylor
