SHORELINE SUBSTANTIAL DEVELOPMENT PERMIT EXEMPTION

APPLICANT NAME	PHONE	MAILING ADDRESS	CITY/STATE/ZIPCODE
James Walter Baxter	206-244-7287	13649 18 th Ave SW	Burien WA 98166

DEVELOPMENT SITE LOCATION	FLOODPLAIN/ShORELINE
8892 SR 970 Cle Elum WA 98922	Teanaway River FIRM # 5300950262B

PROJECT DESCRIPTION

Over time, river erosion has reduced the distance between the cabin on site and the river to 30 feet. This project involves installation of rock and barbs to slow river erosion and protect the property and constitutes normal maintenance which does not require a substantial development permit.

**THIS DEVELOPMENT IS EXEMPT PURSUANT TO WAC 173-27-040(2) (c).
A SHORELINE SUBSTANTIAL DEVELOPMENT PERMIT IS NOT REQUIRED FOR THIS PROJECT.**

THE FOLLOWING CONDITIONS ARE REQUIRED PURSUANT WAC 173-27-040(1):

1. All work shall substantially conform to the specifications of the JARPA submitted to Kittitas County Community Development Services by James Baxter on August 22nd, 2016.
2. Issuance of this shoreline exemption permit does not authorize access onto private property, or waive other jurisdictional agency requirements. The permittee shall obtain consent from respective property owner(s) prior to entering onto private property, and shall obtain and comply with all applicable federal and state permit requirements in completing the proposed development.
3. Issuance of this shoreline exemption will not create liability on the part of Kittitas County or any officer or employee thereof, for any on or off site injury or damages that may result from this project.

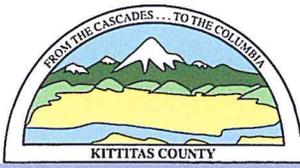

CONSISTENCY ANALYSIS

A shoreline substantial development permit is not required for the project as described due to exemption WAC 173-27-040(2)(c). Although exempted by statute/rule, such exempt developments must comply with all other regulatory requirements of the Shoreline Management Act and Kittitas County Shoreline Master Program.

- The Development will comply with Washington State water laws (See Kittitas County Shoreline Master Program Section 6.19).
- Buffer strips of permanent vegetation between shoreline development and associated water bodies are encouraged, and private and public land owners shall be responsible for the preservation of vegetation to minimize erosion within the shoreline areas (See Kittitas County Shoreline Master Program Section 6.20).
- The stabilization will control erosion while improving water quality, and constitutes normal maintenance and repair (See Kittitas County Shoreline Master Program Sections 5.2 and 7.3.2).
- Nothing in these regulations shall obviate any requirement to obtain any permit, certificate, license, or approval from any state agency or local government (See Revised Code of Washington 90.58.360).
GIS layers show riverine wetlands on the property. Aerial and site photos indicate topography and vegetation not characteristic of a wetland and therefore will not need mitigation or buffering.

Approved By	Date of Issuance	File No.	No. Pages

SHORELINE EXEMPTION PERMITTING

(For projects located within 200 feet of a body of water and/or associated floodway and wetlands under the jurisdiction of the Shoreline Master Program)

REQUIRED INFORMATION / ATTACHMENTS

- A scaled site plan is required showing location of all structures, driveways, well, septic, fences, etc. and proposed uses and distances from property lines, river, and Horizontal distance from OHWM. To show the Horizontal distance a profile view from the OHWM to the edge of structure/activity shall also be shown.
- Include JARPA or HPA forms *if required* for your project by a state or federal agency.
- ~~NA~~ SEPA Checklist, if not exempt per WAC 197-11-800.

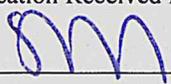

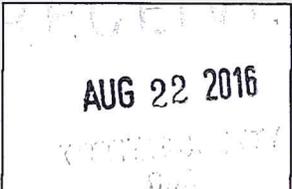

Please note a Shoreline Variance or Shoreline Conditional Use Permit may also be required. See Kittitas County Shoreline Master Program

APPLICATION FEES:

\$830.00 Fees due for this application when SEPA is not required (One check made payable to KCCDS)

\$1500.00 Fees due for this application when SEPA is required (One check made payable to KCCDS)

FOR STAFF USE ONLY

Application Received By (CDS Staff Signature): 	DATE: 	RECEIPT #

General Application Information

1. **Name, mailing address and day phone of land owner(s) of record:**

Landowner(s) signature(s) required on application form.

Name: Baxter, James Walter
Mailing Address: 13649- 18th Ave. S.W
City/State/ZIP: Burien, WA 98166
Day Time Phone: 206-244-7287
Email Address: baxterjw@comcast.net

2. **Name, mailing address and day phone of authorized agent, if different from landowner of record:**

If an authorized agent is indicated, then the authorized agent's signature is required for application submittal.

Agent Name: Thayer, Todd Marcus
Mailing Address: 2131 River Bottom Rd. (P.O. Box 991)
City/State/ZIP: Ellensburg, WA 98926
Day Time Phone: 509-925-5457
Email Address: ThayerExcavatingLLC@gmail.com

3. **Name, mailing address and day phone of other contact person**

If different than land owner or authorized agent.

Name: _____
Mailing Address: _____
City/State/ZIP: _____
Day Time Phone: _____
Email Address: _____

4. **Street address of property:**

Address: 8892 SR 970
City/State/ZIP: Cle Elum, WA 98922

5. **Legal description of property: (attach additional sheets as necessary)**

Acres 5.02 Dunn Short Plat 85-93; PTN.
Lot A-1 1/2 PTN. Lot A-2; Sec 26; TWP 20; RGE 16;
Situs: 8892 SR 970 Cle Elum, 98922.

6. **Tax parcel number(s):** (# 776936) MAP # 20-16-2650-0002.

7. **Property size:** 5.02 (acres)

Project Description

1. Briefly summarize the purpose of the project:

(See attachment)

2. What is the primary use of the project (e.g. Residential, Commercial, Public, Recreation)?

Recreation

3. What is the specific use of the project (e.g. single family home, subdivision, boat launch, restoration project)?

Restoration of River Bank to protect recreation home.

4. Fair Market Value of the project, including materials, labor, machine rentals, etc. approx. \$50,000

5. Anticipated start and end dates of project construction: Start ASP End Early
Aug 2016 Oct 2016

Authorization

Application is hereby made for permit(s) to authorize the activities described herein. I certify that I am familiar with the information contained in this application, and that to the best of my knowledge and belief such information is true, complete, and accurate. I further certify that I possess the authority to undertake the proposed activities. I hereby grant to the agencies to which this application is made, the right to enter the above-described location to inspect the proposed and or completed work.

All correspondence and notices will be transmitted to the Land Owner of Record and copies sent to the authorized agent or contact person, as applicable.

Signature of Authorized Agent:
(REQUIRED if indicated on application)

X [Signature]

Date:

8-8-16

Signature of Land Owner of Record
(Required for application submittal):

X James W. Baxter

Date:

16 AUG 16

FOR STAFF USE ONLY

1. Provide section, township, and range of project location:

¼ Section SE Section 26 Township 20 N. Range 16 E., W.M.

2. Latitude and longitude coordinates of project location (e.g. 47.03922 N lat. / -122.89142 W long.):

47.19 N -120.80 W [use decimal degrees – NAD 83]

3. Type of Ownership: (check all that apply)

Private Federal State Local Tribal

4. Land Use Information:

Zoning: Forest and Range

Comp Plan Land Use Designation: Rural Working

5. Shoreline Designation: (check all that apply)

Urban Conservancy Shoreline Residential Rural Conservancy
 Natural Aquatic

6. Requested Shoreline Exemption per WAC 173.27.040:

SFR Bulkhead Construction

Vegetation

7. Will the project result in clearing of tree or shrub canopy?

Yes No

If 'Yes', how much clearing will occur? _____ (square feet and acres)

8. Will the project result in re-vegetation of tree or shrub canopy?

Yes No

If 'Yes', how much re-vegetation will occur? _____ (square feet and acres)

Wetlands

9. Will the project result in wetland impacts?

Yes No

If 'Yes', how much wetland will be permanently impacted? _____ (square feet and acres)

10. Will the project result in wetland restoration?

Yes No

If 'Yes', how much wetland will be restored? _____ (square feet and acres)

Impervious Surfaces

11. Will the project result in creation of over 500 square feet of impervious surfaces?

Yes

No

If 'Yes', how much impervious surface will be created? _____ (square feet and acres)

12. Will the project result in removal of impervious surfaces?

Yes

No

If 'Yes', how much impervious surface will be removed? _____ (square feet and acres)

Shoreline Stabilization

13. Will the project result in creation of structural shoreline stabilization structures (revetment/bulkhead/riprap)?

Yes

No

If 'Yes', what is the net linear feet of stabilization structures that will be created? 235 ft.

14. Will the project result in removal of structural shoreline stabilization structures (revetment/bulkhead/riprap)?

Yes

No

If 'Yes', what is the net linear feet of stabilization structures that will be removed? _____

Levees/Dikes

15. Will the project result in creation, removal, or relocation (setting back) of levees/dikes?

Yes

No

If 'Yes', what is the net linear feet of levees/dikes that will be created? _____

If 'Yes', what is the net linear feet of levees/dikes that will be permanently removed? _____

If 'Yes', what is the linear feet of levees/dikes that will be reconstructed at a location further from the OHWM? _____

Floodplain Development

16. Will the project result in development within the floodplain? (check one)

Yes

No

If 'Yes', what is the net square feet of structures to be constructed in the floodplain? _____

**Note: A floodplain development is required per KCC 14.08; please contact Kittitas County Public Works*

17. Will the project result in removal of existing structures within the floodplain? (check one)

Yes

No

If 'Yes', what is the net square footage of structures to be removed from the floodplain? _____

Overwater Structures

18. Will the project result in construction of an overwater dock, pier, or float? (check one)

- Yes No

If 'Yes', how many overwater structures will be constructed? _____

What is the net square footage of water-shading surfaces that will be created? _____

19. Will the project result in removal of an overwater dock, pier, or float? (check one)

- Yes No

If 'Yes', how many overwater structures will be removed? _____

What is the net square footage of water-shading surfaces that will be removed? _____

Summary/Conclusion

20. Will the proposed use be consistent with the policies of RCW 90.58.020 and the Kittitas County Shoreline Master Program? (attach additional sheets if necessary)

- Yes No

Please explain:

~~This project~~ project is necessary for protection of existing structures see SMP 6.15(B)(5).

21. Provide any additional information needed to verify the project's impacts to shoreline ecological functions: (attach additional sheets and relevant reports as necessary)

Project Description

1. Briefly summarize the purpose of the project:

A major river bank erosion problem has developed at our property since 2007. It is driven by a large river rock island that grows in size each year. As it has grown, a very high velocity water channel has developed at the interface of our property and the river. Since we purchased the property we have lost approximately 40-50 feet of land to the river. In 2011, we had seven wood current deflectors installed along the river bank, but only two survived the 2016 flood event. The purpose of this project is to install a more robust means of protecting the river bank and to force the high velocity water flow away from the bank and out toward the center of the river. It is imperative that we complete this project expeditiously during the low flow period of the river. We have barely thirty feet of land left in front of our cabin, which creates this urgency, in order to prevent our cabin from being destroyed by another flood. Information and guidance was given for this project by Brent D. Renfrow, (the representative of the Ellensburg WDFW); there was also input from the selected Construction Contractor who has completed similar projects of this type on the Teanaway River. These inputs, along with my own research and study, have resulted in the development of this proposal.

¹Additional forms may be required for the following permits:

- If your project may qualify for Department of the Army authorization through a Regional General Permit (RGP), contact the U.S. Army Corps of Engineers for application information (206) 764-3495.
- If your project might affect species listed under the Endangered Species Act, you will need to fill out a Specific Project Information Form (SPIF) or prepare a Biological Evaluation. Forms can be found at <http://www.nws.usace.army.mil/Missions/CivilWorks/Regulatory/PermitGuidebook/EndangeredSpecies.aspx>.
- Not all cities and counties accept the JARPA for their local Shoreline permits. If you need a Shoreline permit, contact the appropriate city or county government to make sure they accept the JARPA.

²To access an online JARPA form with [\[help\]](#) screens, go to http://www.epermittng.wa.gov/site/alias_resourcecenter/jarpa_jarpa_form/9984/jarpa_form.aspx.

For other help, contact the Governor's Office for Regulatory Innovation and Assistance at (800) 917-0043 or help@oria.wa.gov.

Part 3—Authorized Agent or Contact

Person authorized to represent the applicant about the project. (Note: Authorized agent(s) must sign 11b of this application.) [\[help\]](#)

5f. Provide the latitude and longitude of the project location. [\[help\]](#)

- Example: 47.03922 N lat. / -122.89142 W long. (Use decimal degrees - NAD 83)

+47.190833 N Lat/-120.808056W Long (NAD 83)

5g. List the tax parcel number(s) for the project location. [\[help\]](#)

- The local county assessor's office can provide this information.

Tax Parcel (#776936) Map #20-16-26050-0002

5h. Contact information for all adjoining property owners. (If you need more space, use [JARPA Attachment C.](#)) [\[help\]](#)

Name	Mailing Address	Tax Parcel # (if known)
Rod Batura (1-509-674-5202)	8894 SR 970	
	Cle Elum, Washington 98922	
Ted Philichi (1-253-219-6531)	8890 SR 970	
	Cle Elum, Washington 98922	

5i. List all wetlands on or adjacent to the project location. [\[help\]](#)

None

5j. List all waterbodies (other than wetlands) on or adjacent to the project location. [\[help\]](#)

Teanaway River

5k. Is any part of the project area within a 100-year floodplain? [\[help\]](#)

Yes No Don't know

5l. Briefly describe the vegetation and habitat conditions on the property. [\[help\]](#)

The property is covered with a stand of mature cottonwood trees. The ground cover under the trees has been allowed to grow naturally and is covered with dense brush typical to the area. The Teanaway River runs along the southern boundary of the property with willow trees, brush, sand, and river rock along the boundary line.

5m. Describe how the property is currently used. [\[help\]](#)

The property has a cabin and a separate garage which are located close to the river. It is used by family and friends for recreational purposes. The cabin construction was started in 1986, and was purchased by the present owner in 2007. The previous owner also used the property from 1986-2007 for recreational purposes.

5n. Describe how the adjacent properties are currently used. [\[help\]](#)

The property to the east is a relatively new home with additional out-buildings. It is currently the owners primary residence. (8894). The property to the west (8890) was recently purchased by the current owners who do not live on the property as their primary residence which is located in Tacoma, Washington.

5o. Describe the structures (above and below ground) on the property, including their purpose(s) and current condition. [\[help\]](#)

There are two structures built on the property; a cabin, and a detached garage/workshop. The buildings are well maintained. The cabin has two levels above ground. The structure is built on a partially buried foundation that forms a full basement under the cabin. The upper stories are the living quarters and the unfinished basement is used for recreation and storage purposes. The detached garage/workshop provides an area for maintenance equipment storage, as well as space for a vehicle.

5p. Provide driving directions from the closest highway to the project location, and attach a map. [\[help\]](#)

Drive east on Interstate 90 and take exit 85 which is about 1 mile east of Cle Elum, Washington. Travel east/northeast on State Route 970 until you reach mile marker 5.0; continue around the curve about 300 feet, then turn right off SR970 onto the 8892 property access road.

Part 6–Project Description

6a. Briefly summarize the overall project. You can provide more detail in 6b. [\[help\]](#)

This project consists two basic elements:. (1) The construction of five rock bank barbs spaced along the northern bank of the Teanaway River. Each barb contains anchor rocks placed at the top of the river bank. In addition, key rocks will be situated in the land area leading away from the river in order to stabilize the river bank. (2) The second element involves the construction of two wood related current deflectors between barbs #1 and #2; and barbs #2 and #3. These are needed to provide additional erosion protection in the area where the river bank was completely eroded away.

6b. Describe the purpose of the project and why you want or need to perform it. [\[help\]](#)

A major river bank erosion problem has developed at our property since 2007. It is driven by a large river rock island that grows in size each year. As it has grown, a very high velocity water channel has developed at the interface of our property and the river. Since we purchased the property we have lost approximately 40-50 feet of land to the river. Four years ago (2011) we had seven wood current deflectors installed along the river bank, but only two survived the 2016 flood event. The purpose of this project is to install a more robust means of protecting the river bank and to force the high velocity water flow away from the bank and out toward the center of the river. It is imperative that we complete this project expeditiously during the low flow period of the river.. We have barely thirty feet of land left in front of our cabin, which creates an urgency in order to prevent our cabin from being destroyed by another flood.. Information and guidance was given for this project by Brent D. Renfrow, (the representative of the Ellensburg WDFW) ; there was also input from the selected Construction Contractor who has completed similar projects of this type on the Teanaway River. These inputs, along with my own research and study, has resulted in the development of this proposal.

A suggested alternative to the above stated project:

**If the Core of Engineers would consider removing or altering the huge rock island creating the problem, it could eliminate the need for this costly project.

6c. Indicate the project category. (Check all that apply) [\[help\]](#)

6e. Describe how you plan to construct each project element checked in 6d. Include specific construction methods and equipment to be used. [\[help\]](#)

- Identify where each element will occur in relation to the nearest waterbody..
- Indicate which activities are within the 100-year floodplain.

Channel Modification:

The channel modification will be accomplished by the installation of a series of bank barbs placed at specific locations along the northern river bank of the Teanaway River. The construction of these bank barbs will be created utilizing long-reach tracked excavators working from the bank of the river. The work will be performed by first developing the barb anchor section which supports the excavator. This will enable the building of the barb from a position on the bank extending out toward the center of the river. The rocks forming the barb will be emplaced on the river bed without any excavations. It should be noted that this construction work will be accomplished during the low flow period of the river which would be mid-August through mid-September. Construction of the barbs will also include the excavation of "key rock" channels perpendicular and leading away from the river bank. (see accompanied drawings) The channels will be approximately three feet wide and 1.5-2 feet deep. These channels will be built using backhoe type equipment. After excavating these channels, they will be filled with large rock to be covered with topsoil for supporting vegetation in order to stabilize the river bank.

Bank Stabilization:

The bank stabilization will be accomplished by constructing the series of bank barbs extending into the river. The placement of these barbs will provide periodic restrictions to the high velocity water channel currently surging along the TOE of the river bank. In addition, two wood current deflectors will be installed between barbs (1-2) and (2-3). These would provide added protection in the area where the river bank has been completely eroded away. The above activities will be accomplished within the 100- year flood plain.

6f. What are the anticipated start and end dates for project construction? (Month/Year) [\[help\]](#)

- If the project will be constructed in phases or stages, use [JARPA Attachment D](#) to list the start and end dates of each phase or stage.

Start date :mid-August 2016 End date: mid-Sept 2016 See JARPA Attachment D

6g. Fair market value of the project, including materials, labor, machine rentals, etc. [\[help\]](#)

6h. Will any portion of the project receive federal funding? [\[help\]](#)

- If yes, list each agency providing funds.

Yes
 No Don't know

Part 7–Wetlands: Impacts and Mitigation

Check here if there are wetlands or wetland buffers on or adjacent to the project area.
(If there are none, skip to Part 8.) [\[help\]](#)

7a. Describe how the project has been designed to avoid and minimize adverse impacts to wetlands. [\[help\]](#)

Not applicable

7b. Will the project impact wetlands? [\[help\]](#)

Yes No Don't know

7c. Will the project impact wetland buffers? [\[help\]](#)

Yes No Don't know

7d. Has a wetland delineation report been prepared? [\[help\]](#)

- If Yes, submit the report, including data sheets, with the JARPA package.

Yes No

7e. Have the wetlands been rated using the Western Washington or Eastern Washington Wetland Rating System? [\[help\]](#)

- If Yes, submit the wetland rating forms and figures with the JARPA package.

Yes No Don't know

7f. Have you prepared a mitigation plan to compensate for any adverse impacts to wetlands? [\[help\]](#)

- If Yes, submit the plan with the JARPA package and answer 7g.
- If No, or Not applicable, explain below why a mitigation plan should not be required.

Yes No Not applicable

7g. Summarize what the mitigation plan is meant to accomplish, and describe how a watershed approach was used to design the plan. [\[help\]](#)

7h. Use the table below to list the type and rating of each wetland impacted, the extent and duration of the impact, and the type and amount of mitigation proposed. Or if you are submitting a mitigation plan with a similar table, you can state (below) where we can find this information in the plan. [\[help\]](#)

Activity (fill, drain, excavate, flood, etc.)	Wetland Name ¹	Wetland type and rating category ²	Impact area (sq. ft. or Acres)	Duration of impact ³	Proposed mitigation type ⁴	Wetland mitigation area (sq. ft. or acres)
-----------------------------------------------	---------------------------	-----------------------------------------------	--------------------------------	---------------------------------	---------------------------------------	--------------------------------------------

¹ If no official name for the wetland exists, create a unique name (such as "Wetland 1"). The name should be consistent with other project documents, such as a wetland delineation report.

² Ecology wetland category based on current Western Washington or Eastern Washington Wetland Rating System. Provide the wetland rating forms with the JARPA package.

³ Indicate the days, months or years the wetland will be measurably impacted by the activity. Enter "permanent" if applicable.

⁴ Creation (C), Re-establishment/Rehabilitation (R), Enhancement (E), Preservation (P), Mitigation Bank/In-lieu fee (B)

Page number(s) for similar information in the mitigation plan, if available: _____

7i. For all filling activities identified in 7h, describe the source and nature of the fill material, the amount in cubic yards that will be used, and how and where it will be placed into the wetland. [\[help\]](#)

7j. For all excavating activities identified in 7h, describe the excavation method, type and amount of material in cubic yards you will remove, and where the material will be disposed. [\[help\]](#)

Part 8–Waterbodies (other than wetlands): Impacts and Mitigation

In Part 8, "waterbodies" refers to non-wetland waterbodies. (See Part 7 for information related to wetlands.) [\[help\]](#)

Check here if there are waterbodies on or adjacent to the project area. (If there are none, skip to Part 9.)

8a. Describe how the project is designed to avoid and minimize adverse impacts to the aquatic environment. [\[help\]](#)

Not applicable

This project was designed to minimize the impact on the aquatic environment and protect the river from high velocity water damage. The materials used are all natural and compatible with fish and wildlife habitat requirements. The project does not add or remove any material from the riverbed that would adversely affect fish life. The bank barbs are designed to slow high velocity water and move the flow away from the bank and out toward the center of the channel. Experience with diverters of this type have shown that moving the flow channel "out" enables the development of a scoured channel better suited for fish life. In addition, the placement of the barb anchor sections will serve as periodic restriction to the high velocity water flow along the TOE of the river bank. This slowing of the water creates an environment more attractive to fish habitat.

8b. Will your project impact a waterbody or the area around a waterbody? [\[help\]](#)

Yes No

8c. Have you prepared a mitigation plan to compensate for the project's adverse impacts to non-wetland waterbodies? [\[help\]](#)

- If Yes, submit the plan with the JARPA package and answer 8d.
- If No, or Not applicable, explain below why a mitigation plan should not be required.

Yes No Not applicable

A migration plan should not be required due to the fact that the project does not adversely impact the Teanaway River in any way. The river course, flow, and water quality are basically unchanged. The only affect that the project has is to redirect a high velocity flow (Thalweg) away from the eroding river bank out toward the center of the river. The environment for the fish is likely to be improved along the extent of the project.

8d. Summarize what the mitigation plan is meant to accomplish. Describe how a watershed approach was used to design the plan.

- If you already completed 7g you do not need to restate your answer here. [\[help\]](#)

N/A

8e. Summarize impact(s) to each waterbody in the table below. [\[help\]](#)

Activity (clear, dredge, fill, pile drive, etc.)	Waterbody name ¹	Impact location ²	Duration of impact ³	Amount of material (cubic yards) to be placed in or removed from waterbody	Area (sq. ft. or linear ft.) of waterbody directly affected
Trenching (Keys) (AWB)	N/A	AWB(Away from water body)	Temporary	N/A	N/A
Excavation (ADJ) Top of river bank	Teanaway River	ADJ(adjacent to water body)	Temporary	N/A	60 feet
Rock emplacement (IWB)	Teanaway River	River bed	Permanent	(IWB) -265 Cubic Yards	235 feet
Rock emplacement (AWB) Keys	N/A	(AWB)-keys	Permanent	N/A	N/A
Ballast Rocks IWB (in water body)	Teanaway River	River bed	Permanent	(IWB)- 10 Cubic Yards	N/A

¹ If no official name for the waterbody exists, create a unique name (such as "Stream 1") The name should be consistent with other documents provided.

² Indicate whether the impact will occur in or adjacent to the waterbody. If adjacent, provide the distance between the impact and the waterbody and indicate whether the impact will occur within the 100-year flood plain.

³ Indicate the days, months or years the waterbody will be measurably impacted by the work. Enter "permanent" if applicable.

8f. For all activities identified in 8e, describe the source and nature of the fill material, amount (in cubic yards) you will use, and how and where it will be placed into the waterbody. [\[help\]](#)

It is expected that this project will take about a month to complete. Once the permits are approved, the contractor will schedule the time during the period from mid-August to mid-September in order to have it completed during the low flow period of the river. All fill material used in this project shall be quarry grade rock of varying sizes as noted on the accompanying project drawings. The quantity of rock to be placed in the waterbody is estimated to be 275 cubic yards. All rock emplacement work will be accomplished from the river bank utilizing a long reach tracked excavator. There will be no excavation on the river bed floor during emplacement of these rocks. The impact location of adding rock to the riverbed will occur within the 100- year flood plain.

8g. For all excavating or dredging activities identified in 8e, describe the method for excavating or dredging, type and amount of material you will remove, and where the material will be disposed. [\[help\]](#)

Excavation work identified in table 8e involves the removal of material from the top surface of the bank at each barb structure location by use of the long-reach tracked excavator. In addition, excavation for the key rock channels will be accomplished using standard back-hoe equipment. It is estimated that a total of 20 cubic yards of material will be removed from the bank top locations and about 40 cubic yards of material from the key channel locations. Approximately one-third of the excavated material would be used to cover the key rock emplacements. The remaining material will be used on the property away from the river in low areas which need fill.

Part 9—Additional Information

Any additional information you can provide helps the reviewer(s) understand your project. Complete as much of this section as you can. It is ok if you cannot answer a question.

9a. If you have already worked with any government agencies on this project, list them below. [\[help\]](#)

Agency Name	Contact Name	Phone	Most Recent Date of Contact
Washington Department of Fish and Wildlife	Brent D. Renfrow	(509-925-1013) or cell (360-402-2537)	July 19, 2016
Kittitas County Permit Department	Jeff Watson	(509-962-7506)	July 12, 2016
Corps of Engineers	Debbie Knaub	(206-258-1371)	July 21, 2016

9b. Are any of the wetlands or waterbodies identified in Part 7 or Part 8 of this JARPA on the Washington Department of Ecology's 303(d) List? [\[help\]](#)

- If Yes, list the parameter(s) below.
- If you don't know, use Washington Department of Ecology's Water Quality Assessment tools at: <http://www.ecy.wa.gov/programs/wq/303d/>.

Yes No

The Teanaway River is listed as "impaired" for temperature issues on the Washington Water Quality Assessment (303d) list.

9c. What U.S. Geological Survey Hydrological Unit Code (HUC) is the project in? [\[help\]](#)

- Go to <http://cfpub.epa.gov/surf/locate/index.cfm> to help identify the HUC.

HUC Code # 17030001

9d. What Water Resource Inventory Area Number (WRIA #) is the project in? [\[help\]](#)

- Go to <http://www.ecy.wa.gov/services/gis/maps/wria/wria.htm> to find the WRIA #.

WRIA #39

9e. Will the in-water construction work comply with the State of Washington water quality standards for turbidity? [\[help\]](#)

- Go to <http://www.ecy.wa.gov/programs/wq/swqs/criteria.html> for the standards.

Yes No Not applicable

9f. If the project is within the jurisdiction of the Shoreline Management Act, what is the local shoreline environment designation? [\[help\]](#)

- If you don't know, contact the local planning department.
- For more information, go to: http://www.ecy.wa.gov/programs/sea/sma/laws_rules/173-26/211_designations.html.

Rural Urban Natural Aquatic Conservancy Other _____

9g. What is the Washington Department of Natural Resources Water Type? [\[help\]](#)

- Go to <http://www.dnr.wa.gov/forest-practices-water-typing> for the Forest Practices Water Typing System.

Shoreline Fish Non-Fish Perennial Non-Fish Seasonal

9h. Will this project be designed to meet the Washington Department of Ecology's most current stormwater manual? [\[help\]](#)

- If No, provide the name of the manual your project is designed to meet.

Yes No

Name of manual: N/A

9i. Does the project site have known contaminated sediment? [\[help\]](#)

- If Yes, please describe below.

Yes No

9j. If you know what the property was used for in the past, describe below. [\[help\]](#)

To my knowledge, the property has only been used for recreational purposes since the construction of the cabin beginning in 1986.

9k. Has a cultural resource (archaeological) survey been performed on the project area? [\[help\]](#)

- If Yes, attach it to your JARPA package.

Yes No

9l. Name each species listed under the federal Endangered Species Act that occurs in the vicinity of the project area or might be affected by the proposed work. [\[help\]](#)

The Federal Endangered Species Act (ESA) list identifies four endangered fish species which may reside in the vicinity of this project. These include (1) upper Columbia Spring run Chinook Salmon, (2) lower Columbia River Coho Salmon, (3) middle Columbia River Steelhead, and (4) Bull Trout-USA. Completion of the project described in this proposal will have no adverse effect on any of these species.

9m. Name each species or habitat on the Washington Department of Fish and Wildlife's Priority Habitats and Species List that might be affected by the proposed work. [\[help\]](#)

The Teanaway River has documented populations of Spring Chinook, Coho, Summer Steelhead, and Bull Trout. Both Steelhead and Bull Trout are listed as "threatened" under the Endangered Species "ESA" list discussed in 9l above. With this in mind, the Washington State Fish and Wildlife Representative in Ellensburg, Washington, was instrumental in providing guidance and suggestions for development of this proposal. The result was an approach that would reduce/eliminate the effects of high velocity water on the river bank and yet enhance the fish habitat for about 400 or more feet along the river.

Part 10—SEPA Compliance and Permits

Use the resources and checklist below to identify the permits you are applying for.

- Online Project Questionnaire at <http://apps.oria.wa.gov/opas/>.
- Governor's Office for Regulatory Innovation and Assistance at (800) 917-0043 or help@oria.wa.gov.
- For a list of addresses to send your JARPA to, click on [agency addresses for completed JARPA](#).

10a. Compliance with the State Environmental Policy Act (SEPA). (Check all that apply.) [\[help\]](#)

- For more information about SEPA, go to www.ecy.wa.gov/programs/sea/sepa/e-review.html.

A copy of the SEPA determination or letter of exemption is included with this application.

A SEPA determination is pending with _____ (lead agency). The expected decision date is _____.

I am applying for a Fish Habitat Enhancement Exemption. (Check the box below in 10b.) [\[help\]](#)

This project is exempt (choose type of exemption below).

Categorical Exemption. Under what section of the SEPA administrative code (WAC) is it exempt?

WAC 197-11-835 (2)

Other: _____

SEPA is pre-empted by federal law.

10b. Indicate the permits you are applying for. (Check all that apply.) [\[help\]](#)
