Subject: Shoreline Exemption
Date: Friday, September 16, 2016 1:09:11 PM

Good Afternoon,

We have received an application for a shoreline exemption for 450 Teanaway Acres. After reviewing the submitted paperwork I noticed that you are missing a scaled site plan showing the existing property and proposed project. The planner who processes these applications is away until Tuesday but once he returns I will have him check over the rest of the submittal package to verify we have everything else.

Thank you,

Chelsea Benner

Thanks Dusty, Excuse my sticker shock. I meant to disrespect to you personally. I have filled out the Shoreline exempt form. Looks to me it was just page 1-3 for use to fill out and 4-6 is for the county to complete. Did I see that correctly? I saw the For staff only on top of page 4. If not I can get the other pages filled out and e-mail those to you. As far as the form I have filled out I will be putting it in the mail Monday 9/12. I will have it sent priority mail Attention to you with check and signatures enclosed. I have also printed out every other form that I have submitted to the WDFW and the Army corp. I have also printed all the drawing that have been submitted. These are also attached. I am trying to give you as much information as I can up front. Thought that it would help move this along. My HPA was denied because the state said I needed a SEPPA. Brent is currently looking into this and says I should not need one if I get exemptions from the county and the corp. I already have the corps approved as you will see in the package you will be receiving this week. Please feel free to contact me anytime or my father. Hope this is helpful and look forward hearing from you.

Mr. Henning,

I am sorry, but those are the processing fees. A shorelines permit processing fee would be 2,165 if SEPA was not required. Please feel free to contact me with further questions.

Dusty--

Am I reading this correctly that we need to pay a \$830 or \$1500 permit fee to replace rock that was washed away from our property? Please tell me that is for a shoreline permit and not for the exemption. Please.

Hey there-

See attached site plan example. I also attached the outline of your property.
Please be sure the site plan is to scale and has all buildings, well, and septic labeled. There's a site plan template you can use if you need help with the scaling portion.

Thanks so much!
Have a good weekend ☺

SHORELINE EXEMPTION PERMITTING

(For projects located within 200 feet of a body of water and/or associated floodway and wetlands under the jurisdiction of the Shoreline Master Program)

REQUIRED INFORMATION / ATTACHMENTS

- A scaled site plan is required showing location of all structures, driveways, well, septic, fences, etc. and proposed uses and distances from property lines, river, and Horizontal distance from OHWM. To show the Horizontal distance a profile view from the OHWM to the edge of structure/activity shall also be shown.
- Include JARPA or HPA forms *if required* for your project by a state or federal agency.
- SEPA Checklist, if not exempt per WAC 197-11-800.

Please note a Shoreline Variance or Shoreline Conditional Use Permit may also be required. See Kittitas County Shoreline Master Program

APPLICATION FEES:

\$830.00 Fees due for this application when SEPA is not required (One check made payable to KCCDS)

\$1500.00 Fees due for this application when SEPA is required (One check made payable to KCCDS)

FOR STAFF USE ONLY

General Application Information

1. Name, mailing address and day phone of land owner(s) of record:

Landowner(s) signature(s) required on application form.

Name: Ronald Ray Henning
Mailing Address: 6029 Hawthorne Ter NE
City/State/ZIP: Tacoma, Wa. 98422-1200
Day Time Phone: 206-459-1943
Email Address: r_henning@hotmail.com

2. Name, mailing address and day phone of authorized agent, if different from landowner of record:

If an authorized agent is indicated, then the authorized agent's signature is required for application submittal.

Agent Name: _____
Mailing Address: _____
City/State/ZIP: _____
Day Time Phone: _____
Email Address: _____

3. Name, mailing address and day phone of other contact person

If different than land owner or authorized agent.

Name: Brian Henning
Mailing Address: 1012 17th St. NE
City/State/ZIP: Auburn, Wa. 98002
Day Time Phone: 206-478-1860
Email Address: henninbk@aol.com

4. Street address of property:

Address: 450 Teanaway Acres Rd.
City/State/ZIP: Cle Elum, Wa. 98922-8336

5. Legal description of property: (attach additional sheets as necessary)

ACRES .48, TEANAWAY ACRES LT 13 SEC. 34, TWP. 20, RGE. 16,

6. Tax parcel number(s): 015235

7. Property size: .48 (acres)

Project Description

1. Briefly summarize the purpose of the project:

~~Replace lost rocks along shoreline lost from 2016 flooding to protect existing dwellings on property.~~

2. What is the primary use of the project (e.g. Residential, Commercial, Public, Recreation)?

Protect recreational property and dwellings.

3. What is the specific use of the project (e.g. single family home, subdivision, boat launch, restoration project)?

Restore to previous condition.

4. Fair Market Value of the project, including materials, labor, machine rentals, etc. \$31,000

5. Anticipated start and end dates of project construction: Start Sept 26 2016 End Oct 1 2016

Authorization

Application is hereby made for permit(s) to authorize the activities described herein. I certify that I am familiar with the information contained in this application, and that to the best of my knowledge and belief such information is true, complete, and accurate. I further certify that I possess the authority to undertake the proposed activities. I hereby grant to the agencies to which this application is made, the right to enter the above-described location to inspect the proposed and or completed work.

All correspondence and notices will be transmitted to the Land Owner of Record and copies sent to the authorized agent or contact person, as applicable.

Signature of Authorized Agent:
(REQUIRED if indicated on application)

Date:

X _____

Signature of Land Owner of Record
(Required for application submittal):

Date:

X Ronald Henning

9-11-16

FOR STAFF USE ONLY

1. Provide section, township, and range of project location:

¼ Section 3 Section 34 Township 16 N. Range 20 E., W.M.

2. Latitude and longitude coordinates of project location (e.g. 47.03922 N lat. / -122.89142 W long.):

_____ [use decimal degrees – NAD 83]

3. Type of Ownership: (check all that apply)

Private Federal State Local Tribal

4. Land Use Information:

Zoning: FOREST & RANGE

Comp Plan Land Use Designation: RURAL WORKING

5. Shoreline Designation: (check all that apply)

Urban Conservancy Shoreline Residential Rural Conservancy
 Natural Aquatic

6. Requested Shoreline Exemption per WAC 173.27.040:

WAC 173.27.040(2)(c) NORMAL MAINTENANCE OF BULKHEAD

Vegetation

7. Will the project result in clearing of tree or shrub canopy?

Yes No

If 'Yes', how much clearing will occur? _____ (square feet and acres)

8. Will the project result in re-vegetation of tree or shrub canopy?

Yes No

If 'Yes', how much re-vegetation will occur? RIPRAP WILL BE INCLUDED (square feet and acres)

Wetlands

9. Will the project result in wetland impacts?

Yes No

If 'Yes', how much wetland will be permanently impacted? _____ (square feet and acres)

10. Will the project result in wetland restoration?

Yes No

If 'Yes', how much wetland will be restored? _____ (square feet and acres)

Impervious Surfaces

11. Will the project result in creation of over 500 square feet of impervious surfaces?

Yes No

If 'Yes', how much impervious surface will be created? NA (square feet and acres)

12. Will the project result in removal of impervious surfaces?

Yes No

If 'Yes', how much impervious surface will be removed? MOVEMENT OF IMPERVIOUS MATERIAL (square feet and acres)

Shoreline Stabilization

13. Will the project result in creation of structural shoreline stabilization structures (revetment/bulkhead/riprap)?

Yes No

If 'Yes', what is the net linear feet of stabilization structures that will be created? _____

WILL NOT BE CREATED, BUT MAINTAINED/RESTORED - APPROXIMATELY 40' PER SITE PLAN.

14. Will the project result in removal of structural shoreline stabilization structures (revetment/bulkhead/riprap)?

Yes No

If 'Yes', what is the net linear feet of stabilization structures that will be removed? MOVEMENT OF MATERIAL

Levees/Dikes

15. Will the project result in creation, removal, or relocation (setting back) of levees/dikes?

Yes No

If 'Yes', what is the net linear feet of levees/dikes that will be created? _____

If 'Yes', what is the net linear feet of levees/dikes that will be permanently removed? _____

If 'Yes', what is the linear feet of levees/dikes that will be reconstructed at a location further from the OHWM? _____

Floodplain Development

16. Will the project result in development within the floodplain? (check one)

Yes No

If 'Yes', what is the net square feet of structures to be constructed in the floodplain? _____

*Note: A floodplain development is required per KCC 14.08; please contact Kittitas County Public Works

THERE WILL BE NO STRUCTURES WILL BE CONSTRUCTED. NEW BLOCKS OF ROCK & RIPRAP WILL BE BROUGHT TO THE SITE TO REPAIR DAMAGED SHORELINE

17. Will the project result in removal of existing structures within the floodplain? (check one)

Yes No

If 'Yes', what is the net square footage of structures to be removed from the floodplain? _____

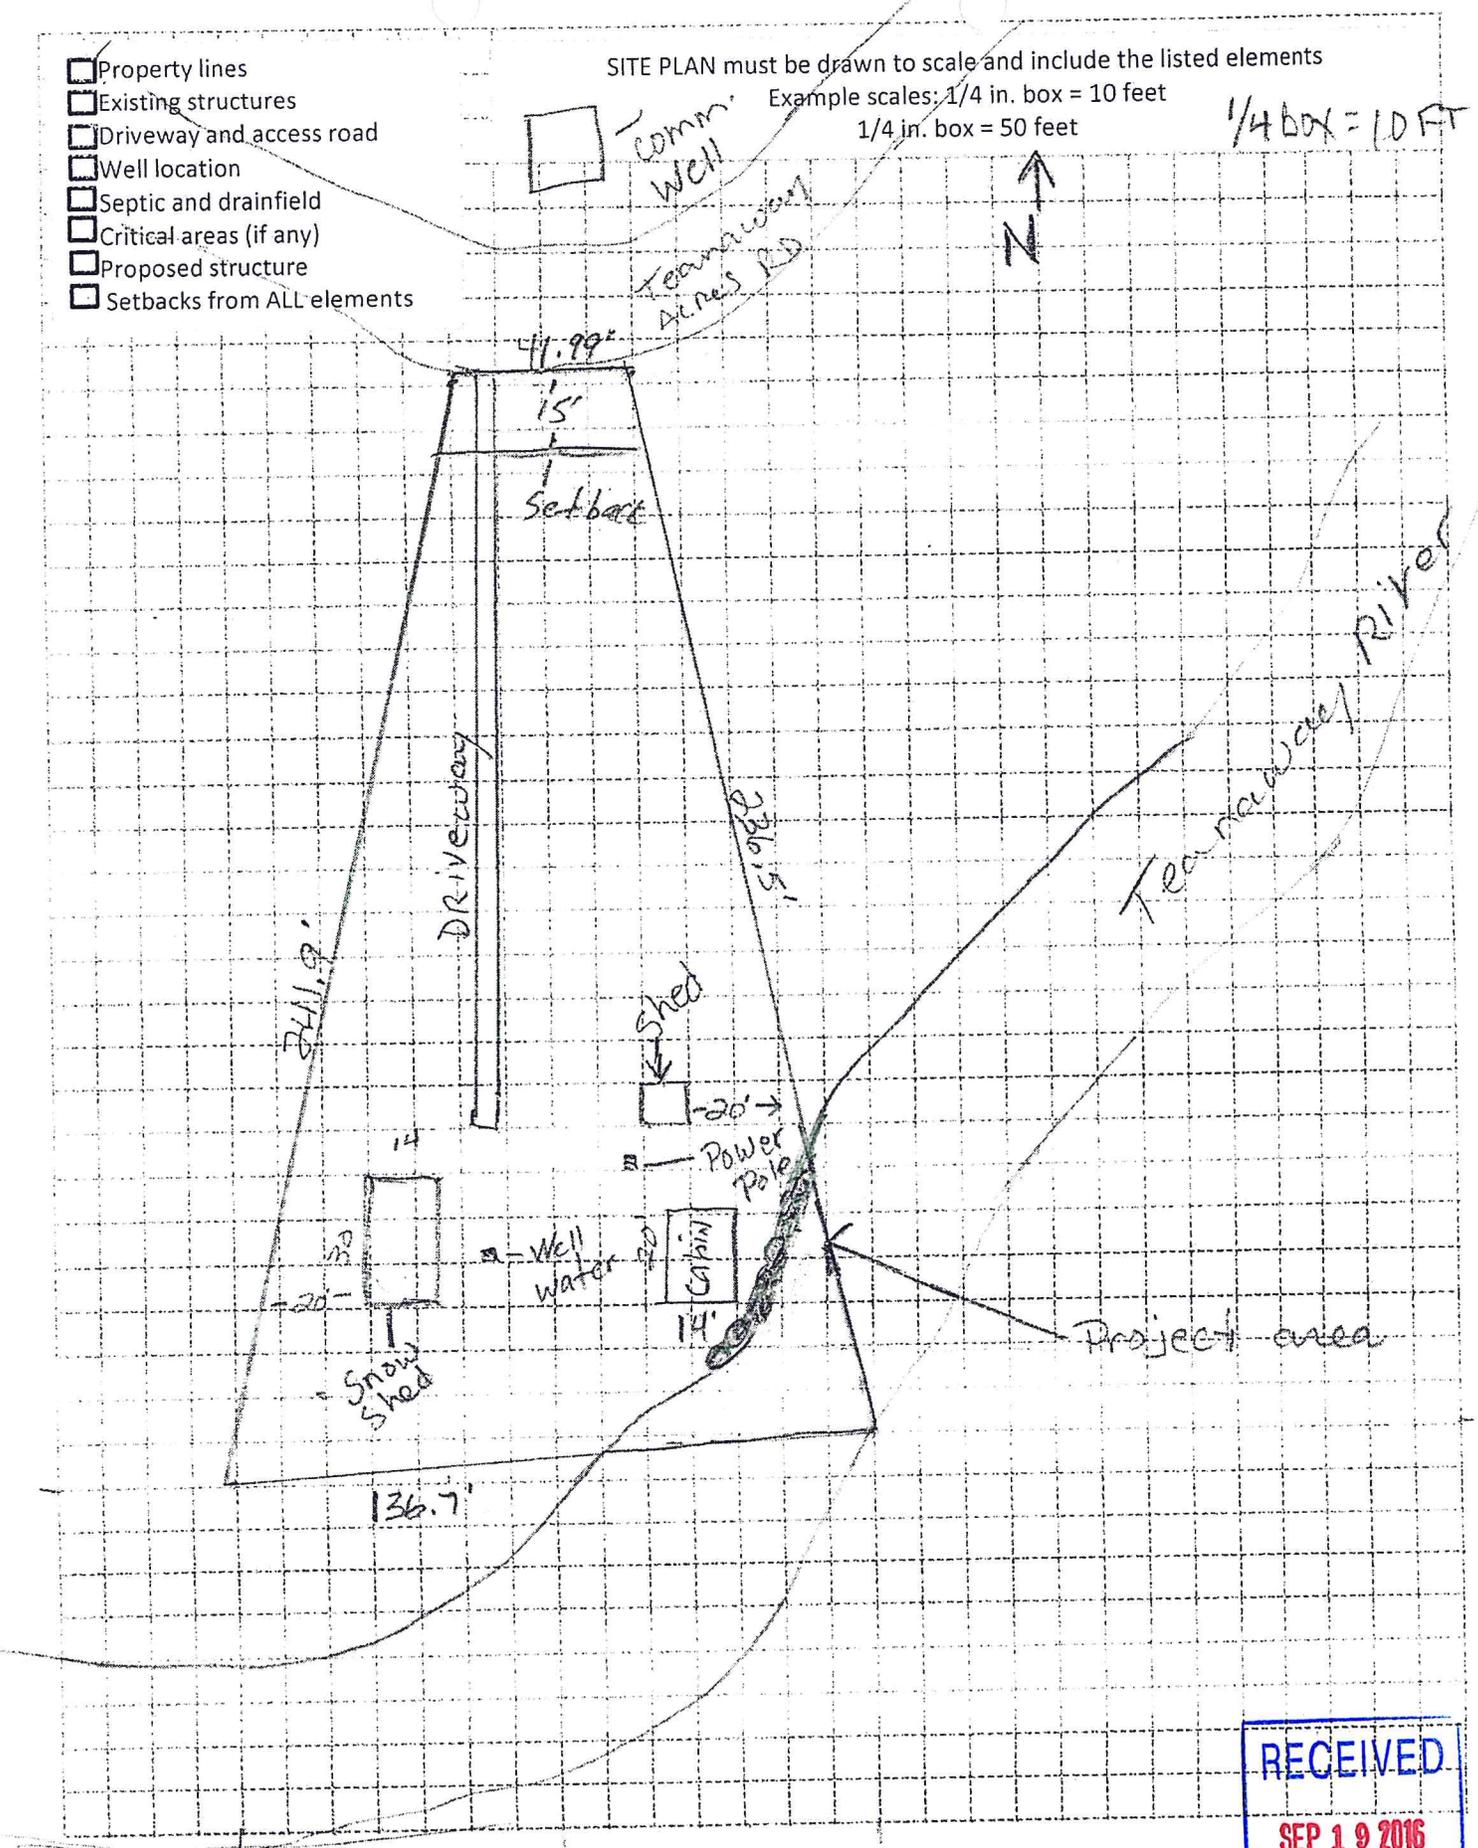

- Property lines
- Existing structures
- Driveway and access road
- Well location
- Septic and drainfield
- Critical areas (if any)
- Proposed structure
- Setbacks from ALL elements

SITE PLAN must be drawn to scale and include the listed elements

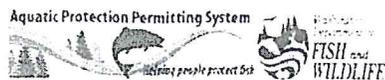

Example scales: 1/4 in. box = 10 feet

1/4 in. box = 50 feet

1/4 BOX = 10 FT

Status

Application Information

Application Type Standard Expedited

WDFW does not accept online applications for emergency HPAs. During normal business hours please call the Habitat Biologist for your project location to request a verbal HPA. You can identify the biologist at the following website: <http://wdfw.wa.gov/conservation/habitat/ahb/>. After normal business hours, please call the Emergency HPA Hotline at (360) 902-2537. If you wish to continue with the online application process, please choose either the Standard or Expedited application type.

- **Standard:** You should apply for a standard HPA if you do not qualify for an expedited or emergency HPA. The majority of hydraulic projects qualify only for a standard HPA.
- **Expedited:** You may apply for an expedited HPA if there is an official declaration by the county legislative authority or the Department of Fish and Wildlife of a threat by weather, water flow, or other natural conditions that is likely to occur within sixty days of a request for a permit application. Expedited work may only be for work to remove any obstructions, repair existing structures, restore banks, protect fish resources, or protect property. The Department of Fish and Wildlife may also issue expedited HPAs where normal permit processing would result in significant hardship for the applicant or unacceptable damage to the environment.
- **Emergency:** You may apply for an emergency HPA if there is an official declaration by the Governor, the county legislative authority, or the Department of Fish and Wildlife of an immediate threat to life, the public, property, or of environmental degradation. Emergency work may only be for a stream crossing, or work to remove any obstructions, repair existing structures, restore streambanks, protect fish life, or protect property threatened by the stream or a change in the stream flow.

Additional Options (select only if they apply to your application):

I am applying for a Pre-application.

You would request the Pre-Application process if:

1. You need to find out if an HPA permit is needed for your project, or
2. You want assistance from a biologist to discuss project details before submitting a complete application. WDFW strongly recommends using the pre-application process as a means to reduce application processing time, increase your understanding of the permit process, and to discuss options/alternatives for your project.

I am applying for a General HPA.

You may apply for a General HPA if all 3 requirements below apply:

1. You want to perform numerous, relatively simple projects anywhere in multiple water bodies
2. The water bodies cover a large geographic area
3. The projects have little or no variability in site conditions or work performed

Site Description:

Repair of existing bridge structure on Pacific Highway in Everett, WA. Project involves work for a bridge, including repair of existing structure, and construction of new structure.

Are you applying for a long-term HPA for agricultural irrigation or stock watering purposes under RCW 77.55.021 (9)(c)? Yes No

Waterbodies (other than wetlands): Impacts and Mitigation

"waterbodies" refers to non-wetland waterbodies.

Describe how the project is designed to avoid and minimize adverse impacts to the aquatic environment.

Not applicable

Construction activities such as excavation, grading, and other earthmoving activities shall be restricted to the stream banks and shall be restricted to the stream banks and shall be restricted to the stream banks...

Will your project impact a waterbody or the area around a waterbody?

Yes No

Describe how your project will impact a waterbody or the area around a waterbody.

Construction activities such as excavation, grading, and other earthmoving activities shall be restricted to the stream banks and shall be restricted to the stream banks...

Describe impact(s) that cannot be avoided through project design and implementation. For each location, please include the following:

- General location description where the impact(s) will occur (e.g. stream bank, beach front, 2-foot strip from bank, portion of gravel bar, etc.)
- Provide length, quantities, and/or area of impact

Construction activities such as excavation, grading, and other earthmoving activities shall be restricted to the stream banks and shall be restricted to the stream banks...

Have you prepared a mitigation plan to compensate for the project's adverse impacts to non-wetland waterbodies?

- If yes, submit the mitigation plan in Attachments section of this application
- If No, or Not applicable, explain below why a mitigation plan should not be required.

Yes No Not applicable

Describe the source and nature of any fill material; amount (in cubic yards) you will use, and how and where it will be placed into the waterbody.

Construction activities such as excavation, grading, and other earthmoving activities shall be restricted to the stream banks and shall be restricted to the stream banks...

Describe the source and nature of any fill material; amount (in cubic yards) you will use, and how and where it will be placed into the waterbody.

Construction activities such as excavation, grading, and other earthmoving activities shall be restricted to the stream banks and shall be restricted to the stream banks...

For all excavating or dredging activities, describe the method for excavating or dredging, type and amount of material you will remove, and where the material will be disposed.

Construction activities such as excavation, grading, and other earthmoving activities shall be restricted to the stream banks and shall be restricted to the stream banks...

SEPA Compliance

Compliance with the State Environmental Policy Act (SEPA):

- For more information about SEPA, go to www.ecy.wa.gov/programs/sea/sepa/e-review.html

SEPA review is complete. I will upload, mail, or deliver a copy of the SEPA determination letter as part of this application.

- A SEPA determination is pending.

SEPA determination is pending with [SEPA Determination Exemption](#)

Expected date for SEPA determination is [7/21/2016](#)

This project is exempt. I will upload, mail, or deliver a draft of the SEPA Letter of Exemption as part of this application.

Application Fee Exemption

Unless your project qualifies for one of the exemptions or alternative payment methods below, your application is subject to a \$150 application fee.

Please select the appropriate exemption category below:

WDFW is under written contract with non-WDFW applicant agency or business to provide HPA permitting services without individual application fee requirements.

Project occurs on farm and agricultural land

(Attach a copy of current land use classification recorded with the county auditor, or other proof of current land use.)

Project is a modification of an existing HPA originally applied for, prior to July 10, 2012.

Project is a cooperative fish or wildlife project that will be conducted by a volunteer group as defined in RCW 77.100.020 under agreement with the department.

- Do not qualify for an application fee exemption

Henning, Ronald Ray
(Bank Repair)

Dear Mr. Henning:

We have received your application for a Department of the Army (DA) permit to replace riprap that was washed away during two flood events in 2015 and 2016 in the Teanaway River, near Ellensburg, Kittitas County, Washington. Regulations and guidelines implementing our regulatory program under Section 404 of the Clean Water Act (Section 404) generally require that you obtain a permit prior to discharging dredged or fill material into waters of the U.S., including wetlands. For more information, see the enclosed *Clean Water Act Extracts and Definitions*. However, certain discharges are exempt from regulation under the Clean Water Act.

Federal Regulation 33 CFR 323.4(a)(2) states that the maintenance, including emergency reconstruction of recently damaged parts, of currently serviceable structures such as dikes, dams, levees, groins, riprap, breakwaters, causeways, bridge abutments or approaches, and transportation structures generally does not require a DA permit. Maintenance does not include any modification that changes the character, scope or size of the original fill design. Emergency reconstruction must occur within a reasonable period of time after damage occurs in order to qualify for this exemption.

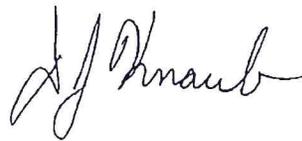

In addition to the above requirements, the discharge of dredged or fill material must meet two additional requirements to qualify for an exemption: (1) the discharged material may not contain a toxic pollutant listed under Section 307 of the Clean Water Act and (2) the discharge may not convert an area of waters of the U.S. to a use to which it was not previously subject where the flow, circulation, or reach is impaired or reduced. Please contact us for a DA permit if your proposal does not meet these requirements.

Based on the information you provided, the discharge of dredged or fill material included in your proposal qualifies under the above described exemption in our regulations and, therefore, does not require a Section 404 DA permit. The Corps also regulates work in navigable waters of

the U.S. under Section 10 of the Rivers and Harbors Act. However, since the proposed work would not occur in a navigable water of the U.S., it will not require a Section 10 DA permit.

While a DA permit is not required for your proposal, local, state, and other federal requirements may apply. For assistance in determining other permit requirements for the proposed project, we recommend you contact the Washington State Office of Regulatory Assistance via the internet at www.ora.wa.gov. If you have any questions, please contact Ms. Debbie Knaub at deborah.j.knaub@usace.army.mil or by phone at (206) 258-1371.

Sincerely,

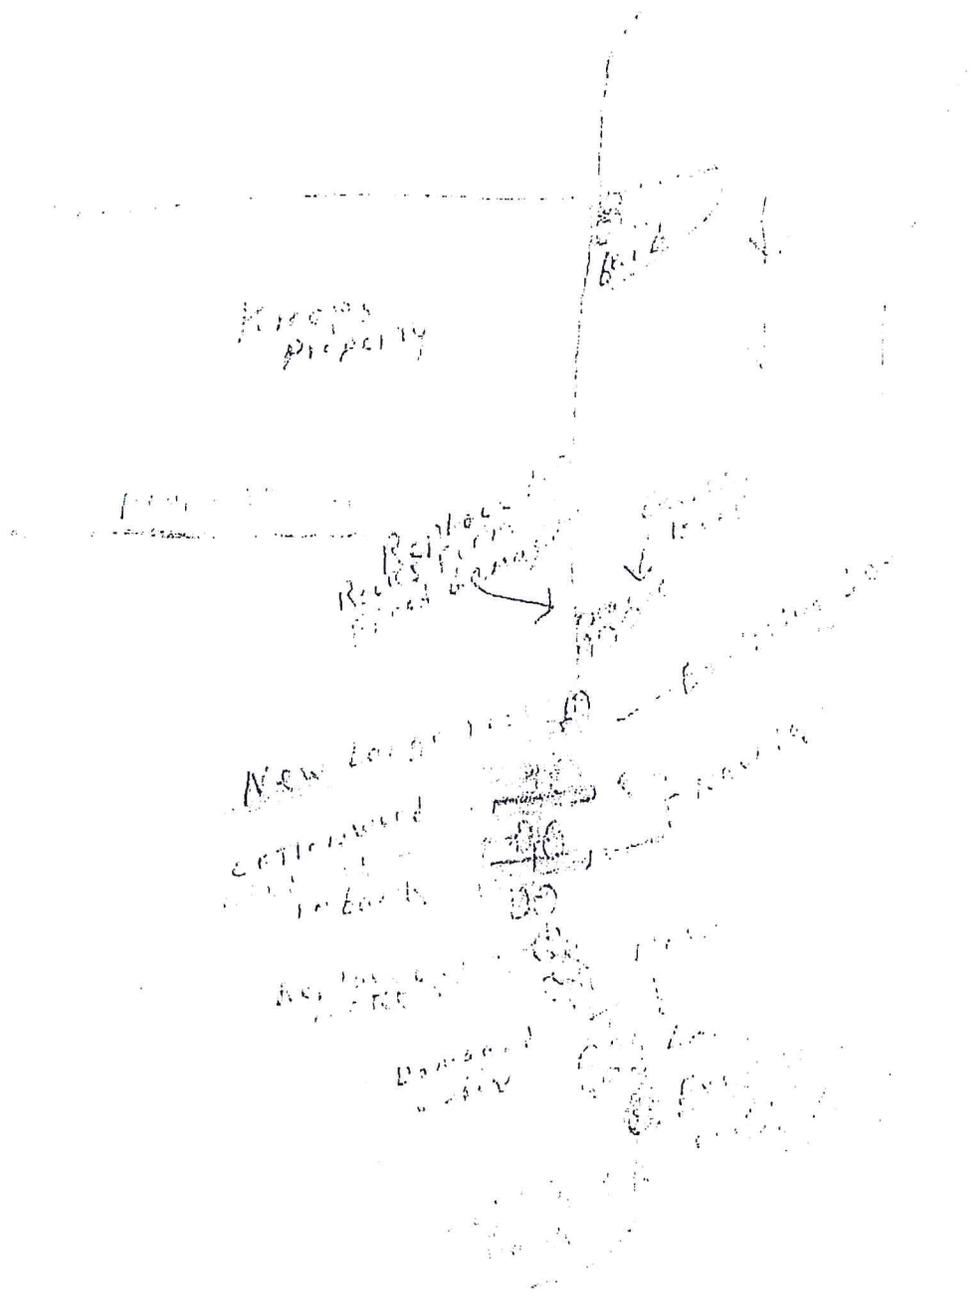

A handwritten signature in black ink, appearing to read "J. Printz". The signature is fluid and cursive, with the first letter of the first name being a large, stylized capital letter.

Jacalen Printz, Section Chief

Parcel No: 100 Year Flood: Yes

Drive Direction:

08. Project Description

*** Will you be operating equipment in water?**

Yes

*** Type of equipment used**

Dump truck for hauling large rock and riff raff onto property.

Track hoe with Thumb for strategically placing rock and woody debris from shore.

*** Summarize the overall project.**

Bank protection- Replace large angular rocks lost from existing riprap and bank barbs, install large woody debris and plant trees and shrubs lost from 2015-2016 historic flooding.

*** Describe how you plan to construct each project element. Include specific construction methods and equipment to be used. Identify where each element will occur in relation to the nearest waterbody. Indicate which activities are within the 100-year flood plain.**

1.) Replace large angular rocks with track hoe to repair existing barbs that have been washed way from 100 year flooding levels in 2015-2016.

2.) Bank barbs shall be restored to approximately their pre-flood dimensions Add additional boulders to barb adjacent to cabin to provide better flood flow transition around cabin. Work should be done in a manner to minimize discharge or earth and fine sediment to river. Barbs shall be built constructed of large angular rock and woody debris sufficient enough to prevent them from being washed away by 100 year flooding.

3.) Replace rock and woody debris to shoreline in-between barbs lost from previous flooding.

4.) Cuttings of native woody plants adapted to riverbanks (i.e. Black cottonwood, gravel bar willows and Redosier dogwood) should be planted in the keyway of each barb and in-between each barb to the extent practicable. Cuttings will be planted to a depth within the low flow of the water table and above.

5.) Build berm along top of bank to prevent high water from flowing over bank. Plant native plants and grassy plants on top and around berm to root and prevent soil erosion.

6.) Track hoe may need to partially enter water to reach and replace rocks at south east side of cabin that have been lost from record flooding. This will only be done if no other method is applicable.

7.) All earth areas adjacent to water course which will be disturbed by this project shall be seeded with a suitable erosion seed mix and protected from erosion with a weed-free straw mulch or equivalent erosion protection within seven days of project completion.

*** Requested Project Start Date:**

08/14/2016

*** Requested Project End Date:**

09/30/2016

*** Describe how the project is designed to avoid and minimize adverse impacts to the aquatic environment.**

Installation of large rock and woody and all shoreline excavation shall be performed from shore line with the exception of the placing of rock on the south east corner of cabin only. This will be used to place only three of four key large boulders to the reinforce the damaged bar that exists currently. Previous attempts from shore only have failed to hold up over the past few years do to the inability to reach key areas from shore. Access shall be done at low water levels and equipment shall be maintained in good working condition such as hydraulic fluid, fuel, lubricants and other harmful chemicals are not leaked into river or its banks or bed, Equipment shall be inspected daily. Servicing of equipment shall be done in an upland area.

*** Will your project impact a waterbody or the area around a waterbody?**

Yes

*** Describe how your project will impact a waterbody or the area around a waterbody.**

Project shall prevent erosion of bank, eliminating dirt and sediment into the river and its beds. Prevent structures and or its contents to enter river and or its beds from flooding. Project will add shade and provide cover for fish, wildlife . It shall provide protection to smaller game, fish and other aquatic organism's. It shall create current blocks and pools for fish and wildlife to rest during high current situations or migration upstream.

*** Describe impact(s) that cannot be avoided through project design and implementation. For each location, please include the following: General location description where the impact(s) will occur (e.g. stream bank, beach front, 2-foot strip from bank, portion of gravel bar, etc.) Provide length, quantities, and/or area of impact**

Track hoe must enter partially into river bed to place a few key boulders to south east corner of cabin. Back hoe will enter just down stream of cabin just below the two large cotton wood trees. Access will be very minimal and shall not have adverse effect to the environment. Aces should be used only to construct the lower bar. Once bar is completed the bank will be brought back to it's original condition. The rest of project shall all be completed from shore.

*** Have you prepared a mitigation plan to compensate for the project's adverse impacts to non-wetland waterbodies?**

NA

*** Have you prepared a mitigation plan to compensate for the project's adverse impacts to non-wetland waterbodies?**

No adverse impact shall be realized from project.

*** Describe the source and nature of any fill material, amount (in cubic yards) you will use, and how**

09. Waterbodies (other than wetlands): Impacts and Mitigation

and where it will be placed into the waterbody.

Large boulders riffraff will come from local quarries. Woody debris will also be brought in from local area and plant vegetation will be attended from upland property's.
All rock will be placed individually by track hoe with thumb.

10. SEPA Compliance

*** Compliance with the State Environmental Policy Act (SEPA).**

For more information about SEPA, go to "<http://www.ecy.wa.gov/programs/sea/sepa/e-review.html>"

A SEPA determination is pending.

"SEPA determination is pending with kittitas county, core of engineers"

Mr. Henning,

I have printed this up and put it into the hopper; we have had something of a flurry of shoreline activity lately and I'm not sure how the Interim Director wants to distribute the workload. He will be back on Monday. Historically I haven't been assigned a lot of shoreline work, which may be changing, but that will be Mr. Hansen's call. Shoot me another email mid-week if you haven't heard anything from us.

Subject: FW: Teanaway River Project - application number 7491 Pre-Application Review for Standard Hydraulic Project

Jeff and Deborah—

I am sending this information to you for my father Ronal Henning. I am helping him work on getting these permits completed as to the best of our ability. It can be confusing to the common individual or at least us. We are on a shorter deadline than previously expected. Brent and Scott from the DFW have been a great help so far and as I understand it we are now in need of help from your two departments. As you can see below we have been working with Brent and Scott from the DFW for a couple of months now getting our Standard Hydraulic Project  (7491). Permit was submitted but as you can see in the above attachment was reject for insufficient information. We are being told we need SEPA information. What we are looking for is to do this work under the previous permits we have received in the past to do the same work in years past due to flood damage in 1999 and 2009. And are looking to get an exemption for the SEPA and shoreline permit to perform the same work as current approvals from the county and corp. of engineers as I understand the exemption process. (WAC [197-11-800](#) or WAC [197-11-835](#)) This project is only intended to replace what has been lost by 2016 flooding. No additional work or additions will be realized.

Attached #1 & 2 are copies of the new Jarpa we filled out online and a signed copy from page 11 of the Jarpa. Attachment #3 is the help Brent gave us of the work area and work we would like to perform.

Attachment #4 is the letter from the state saying that our HPA was insufficient due to the lack of SEPA information.

Any help you could give us would be greatly appreciated.

Thank you

Ronald Henning

Subject: RE: Teanaway River Project - application number 7491 Pre-Application Review for Standard Hydraulic Project

Brian,

Teanaway River flows have been dropping with the summer weather. It is easier now to see the toe of the damaged riprap and barbs at your Teanaway Acres cabin.

As you know, you will need an HPA from the Dept. of Fish & Wildlife for work affecting the river. You will also need either a Shoreline permit or written exemption from Kittitas County and approval or exemption from the Army Corps of Engineers for placing of rock fill in the river. Repair of existing, serviceable structures is typically allowed under Kittitas County Code, and can be exempt from the requirement to obtain an Army Corps of Engineers permit. The most practical option to address the problems soon (without lengthy design review) is to repair the shoreline protection to approximately what was when last approved. I believe you have copies of previous permits for the property. (I have HPAs from 1999 and 2009 if you need them.) I did ask my contacts at both Kittitas County and the Army Corps about their expectations for the work and HPA, but I have not heard anything back specifically regarding your property or project. I will send a follow-up email today.

After the floods in 2009, the property was repaired with a combination of large riprap, two short bank barbs, 3 logs with rootwads, and plantings of trees/shrubs. Using that as the starting concept for the work for this year, you will need to do the following:

- 1) Convert the Pre-application review request you submitted through the "APPS" system to a permit request. I believe you can do this using your Application number 7491. You will need to add additional information into the APPS system and pay the \$150 application fee. You can also have the APPS system export the information you have entered into a JARPA form, which you will need to send to Kittitas County with your request for a shoreline permit exemption or permit, and also to the Army Corps of Engineers regarding permit exemption for repair.
- 2) You will want to attach some "supplemental documents" with additional drawings to clarify the amount and details of work proposed. I suggest you provide typical cross-section drawings of the riprap bank repair (one through the cabin, one through a typical bank section upstream from the cabin) showing existing/proposed slopes...which you can use to help calculate the volume of rock needed.
- 3) Contact Kittitas County and the Army Corps requesting permits or exemptions for repair work (contact information below). Include a copy of the JAPRA form and drawings. The Army Corps will want to know the quantity of rock material you are placing below the ordinary high water mark of the river.

As a starting point for discussion, I will send you a very rough draft HPA for the repair, some concept sketches and some updated pictures. I have attached a PDF version of annotated powerpoint slides that provides background information for your Teanaway Acres property.

A small levee has been added to the property over the years. Since this property is in the FEMA Floodway, the fill & levee is a violation of the code and it is unlikely that Kittitas County can approve it. It should be removed during the bank repair. If you think a levee is needed to deflect water away from the cabin, it should be replaced with a landscape feature that functions as a "ring levee" around the immediate area of the cabin but does not block flood water from overtopping the bank between your property and the adjacent properties.

Contact information for Kittitas County and the Corps is:

Brian,
We'd like to get back out to the site to take some more measurements and help you turn your pre-app into an application. Do we have your blessing to visit your property to collect a little more info? It would probably be later this week or next week.

Thanks.

Scott

Brian,
I just got back today from A/L, sorry to be delayed in this. Brent and I will find some time this week to get our heads together and plan, including reaching out to the county and Army Corp of Engineers to see if they are going to require anything or if it is just between you and WDFW. I'll plan on getting back in touch with you by the end of the week on this.

Thanks,

Good day Scott-

I thought I would touch bases with you to see where we are at on our project on the Teanaway river. I have not heard from you since we met back in May, so I thought that I would reach out and see where we are at or if there is anything else I can do to help move this project along.

I would also like to ask to see if you could send me some contact information on some potential local contractors. I would like to start reaching out to some of them to check availability so we do not get caught with no one available during our time line.

Feel free to reach out via phone or e-mail at anytime.

Thank you.

Tacoma, WA 98422-1200

Dear Ronald Henning:

SUBJECT: APPLICATION FEE OR ADDITIONAL APPLICATION INFORMATION REQUIRED FOR TEANAWAY RIVER PROJECT, (WDFW APPLICATION ID: 7491)

Washington Department of Fish and Wildlife cannot assign your application for a Hydraulic Project Approval (HPA) to a biologist for review because you have not included some required information. **If you wish to have your application processed, you must provide the information.** If you choose to mail the information, please submit the information in a single package as multiple mailings will delay processing. Please be aware that you may be asked for further information to complete your application after it is assigned to a biologist for processing.

Written notice of compliance with the State Environmental Policy Act (SEPA) is required, including exemption or type of determination, date of exemption or final determination date, and lead agency. Your application indicates that a SEPA determination is pending. Please forward the final determination to WDFW when it becomes available.

NOTE: Under WAC 220-660-050 applications that are incomplete or on hold longer than 6 months may be closed without notice from the Department due to inactivity. The application fee is not refundable. If you wish to continue with your project after the application is closed you will need to submit a new application.

If you submitted your application using [APPS](#), please login to [APPS](#) and provide the missing information. Otherwise, please send the missing information, including reference to **Application ID (7491)** to **one** of the following:

- Washington Department of Fish and Wildlife, PO Box 43234, Olympia, WA 98504-3234 **or**
- Fax to (360) 902-2946 **or**
- Email to HPAapplications@dfw.wa.gov.

If you have any questions, please call me at 360-902-2422.

Sincerely,

A handwritten signature in black ink that reads "Kelly Aaron". The signature is written in a cursive style with a large, looping "K" and "A".

Levee along top of riprap

2016/05/20

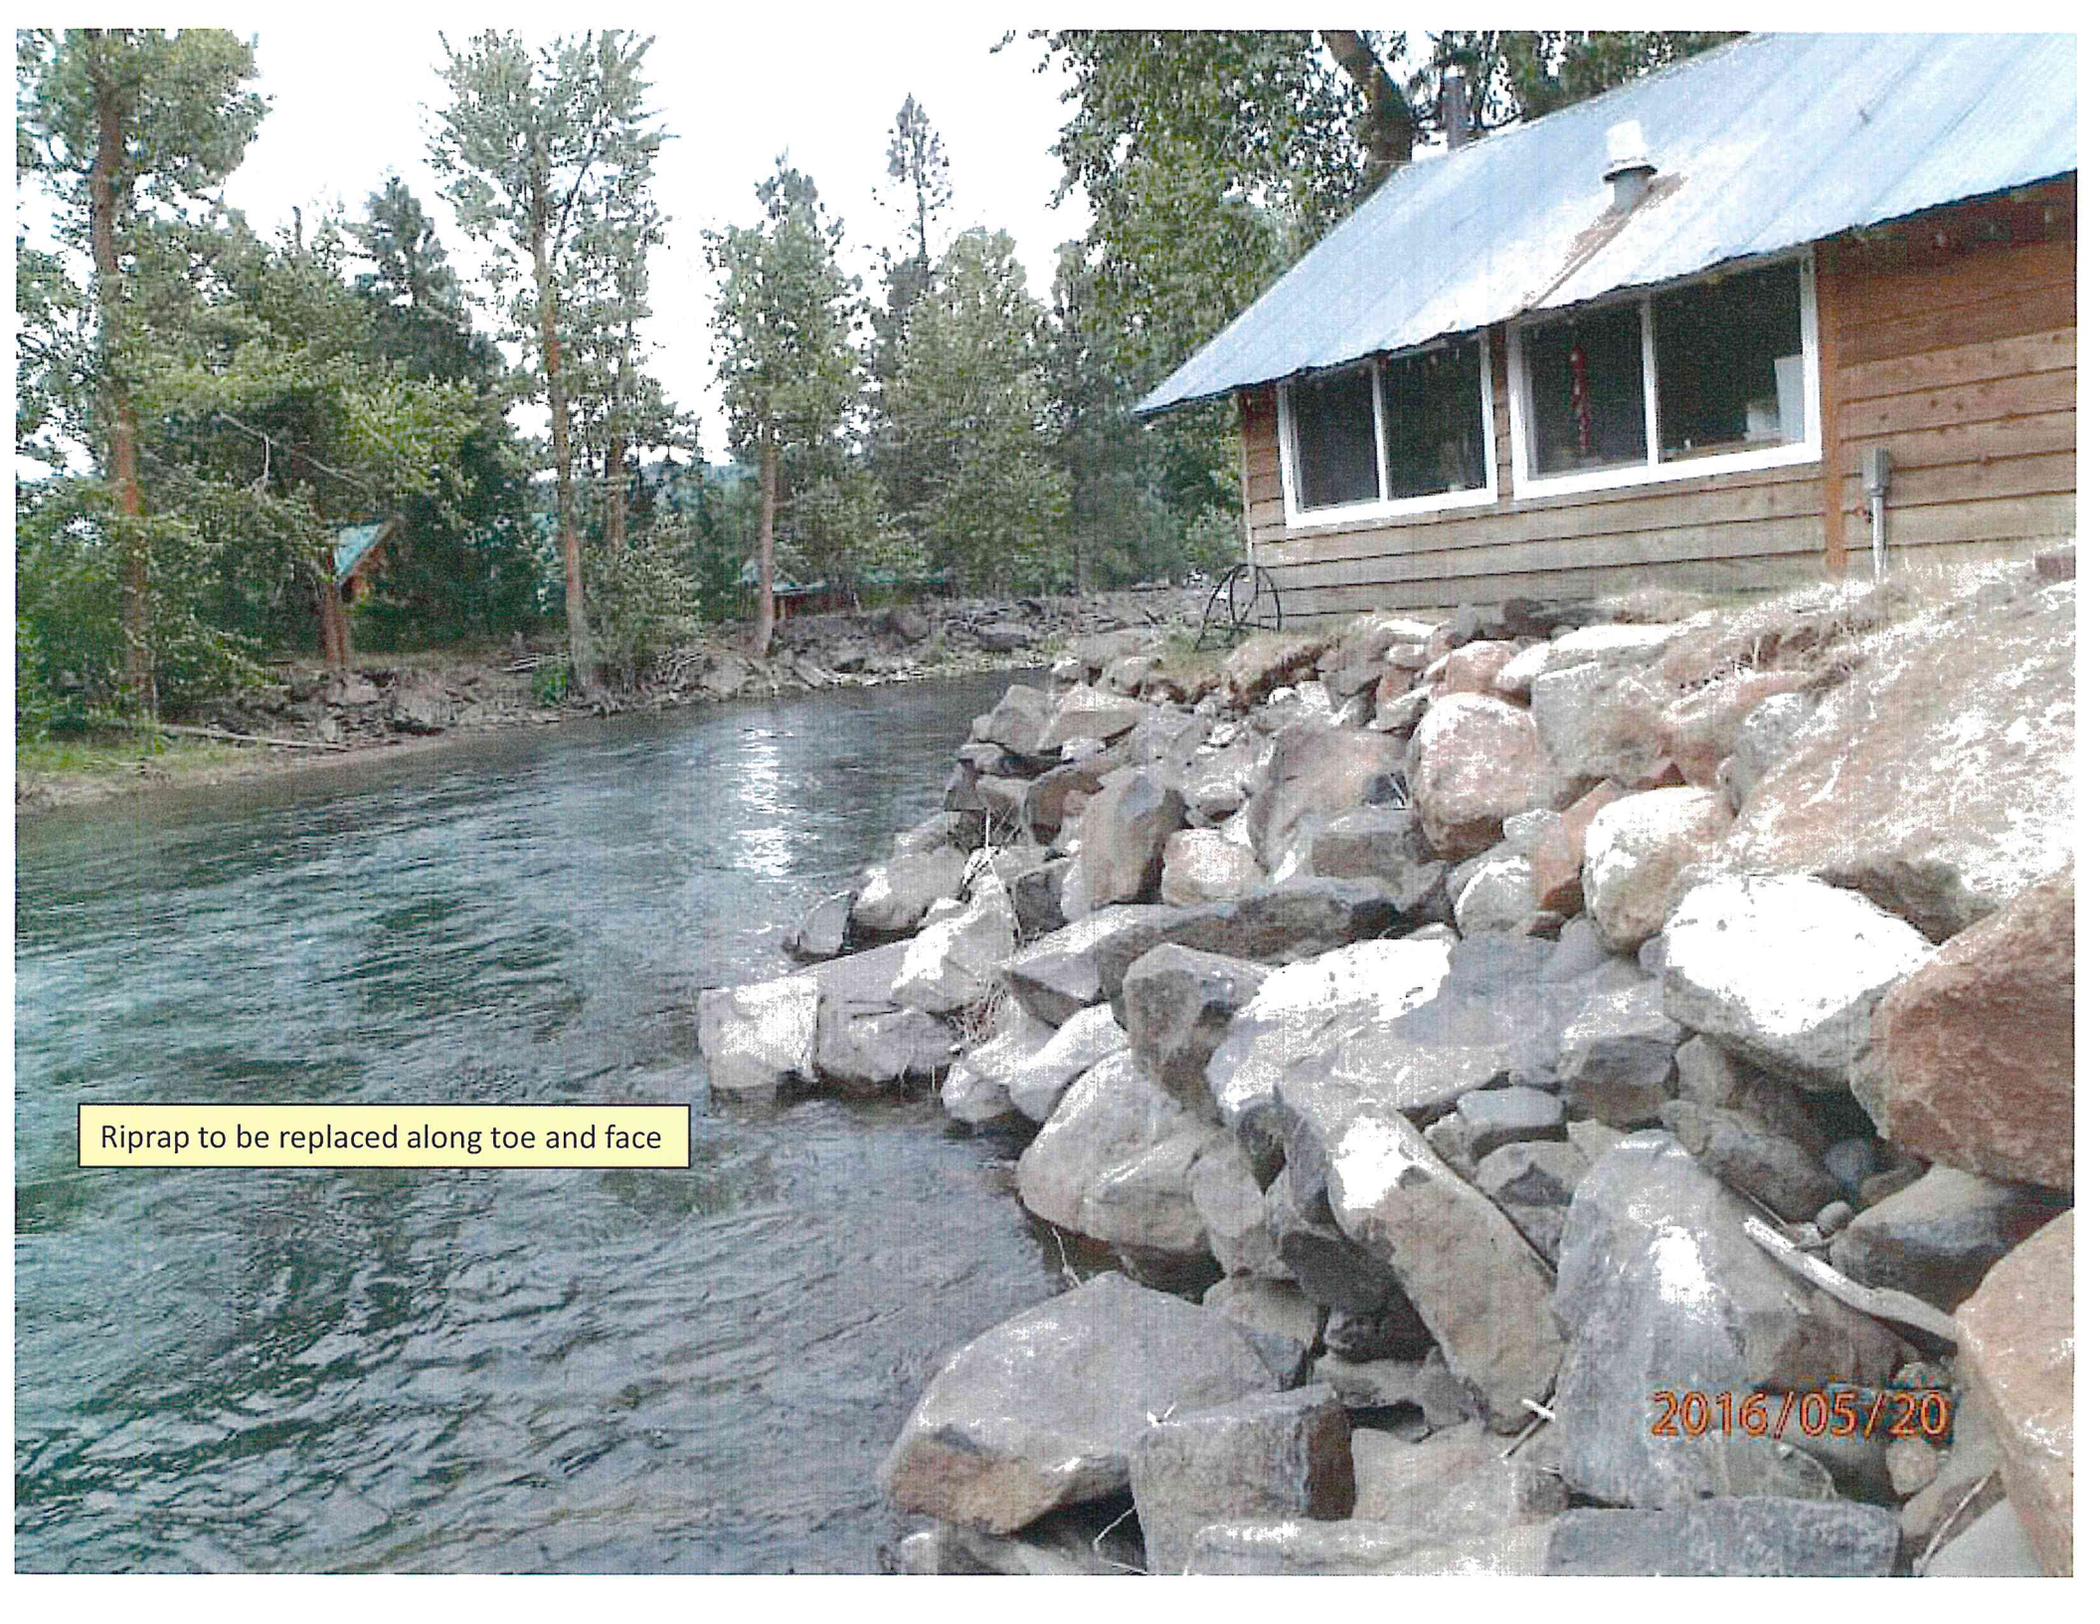

view looking upstream from Henning cabin

A photograph showing a riverbank with a riprap structure. The riprap is a long, narrow line of large, light-colored rocks extending from the foreground towards the background. To the right of the riprap is a wooden cabin with a corrugated metal roof and several windows. The river is on the left side of the image, and the background is filled with dense green trees. A yellow box with black text is overlaid on the image, pointing to a specific area of the river.
