Re: Yellowstone Trail Estates (LP-09-00006)

Dan:

Please accept this letter as a formal request for an extension to the response deadline of November 5, 2009 for additional information requested by Kittitas County Community Development Services (by letter dated 9/8/09) for the above referenced preliminary plat. We have completed the wetlands delineation and made revisions to the preliminary plat accordingly. The wetlands report is in process and I would like to forward a copy of the report and revised plat to Brent Renfrow, District Habitat Biologist (WDFW), for his review and comments before finalizing the preliminary plat and submitting it to CDS. The conceptual stormwater, road and snow management plans are also in process, but they too are pending any final revisions to the preliminary plat.

Assuming that we receive timely comments back from WDFW, I would anticipate not requiring more than 60 days to submit the requested additional information to CDS. Therefore, please extend the additional information request deadline to January 5, 2009.

Thank you,
