SEPA ENVIRONMENTAL CHECKLIST

Purpose of checklist:

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants:

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown. You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for Lead Agencies:

Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for non-project proposals:

For non-project proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B plus the SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS (part D). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in Part B - Environmental Elements –that do not contribute meaningfully to the analysis of the proposal.

APPLICATION FEES:

- \$600.00 Kittitas County Community Development Services (KCCDS)
- \$70.00 Kittitas County Department of Public Works

- \$670.00 Total fees due for this application (One check made payable to KCCDS)**

Trailhead Town Homes

Project Narrative

RECEIVED
APR 03 2017
Kittitas County CDS

The Trailhead Town Homes project is proposed for development on what was originally the "Phase 3" site on the Trailhead Condominium Binding Site Plan project.

The Ownership group is proposing a town home project consisting of 14 homes in 7 buildings on individual lots accessed via private road and driveway.

The project is on 4.76 acres within the Village Core of the Suncadia Resort.

Water & Sewer will be provided via the Suncadia Water & Sewer systems that are ready to serve this parcel. PSE will provide gas and electric service. Atlas Networks will provide telephone, internet and TV.

The individual town homes will be sold as Single Family Residences.

A Homeowner's Association will be created to manage the access, private roads and driveways within the project. The HOA will also be used as a conduit for cooperative management with the Suncadia HOA and the adjacent Trailhead Condominiums.

The attached site plan shows the proposed town home lots and the private roads/driveway areas.

Each town home will have 2 stories. Main floor living area will consist of 889 sf. Upper floor living area will be 1,243 sf, for a total of 2,142 sf per town home. There will be 4 bedrooms and 4 ½ baths per town home. 2 car garages will be 418 sf each, for a total of 2,560 sf per town home and 5,120 sf per building.

The site plans and floor plans/elevations have been reviewed and approved by Suncadia.

Water and Sewer Utility Infrastructure
Parcel #20-15-19055-0003; Owner: Highway 9 Office Park Center, llc.

The purpose of this letter is to address water and sewer availability to service the above referenced 14-unit (7 duplex buildings) development.

Water service to the development parcel is provided by the Suncadia Water Company. An existing 8-inch water main on Suncadia Trail fronts the project and will provide adequate capacity and flow for the anticipated level of development. After necessary mains and service lines are constructed and conveyed per Suncadia Water Company standards, the Suncadia Water Company will provide service to the 14 individual units.

Sewer service to the development parcel is provided by the Suncadia Environmental Company sewer system. Existing sewer mains include an 8-inch main in Suncadia Trail and a 12-inch main between the adjacent parcel and the golf course driving range. After the sewer mains and service stubs to the individual units are constructed and conveyed per Suncadia Environmental Company standards, the Suncadia Environmental Company will provide service to the 14 individual units.

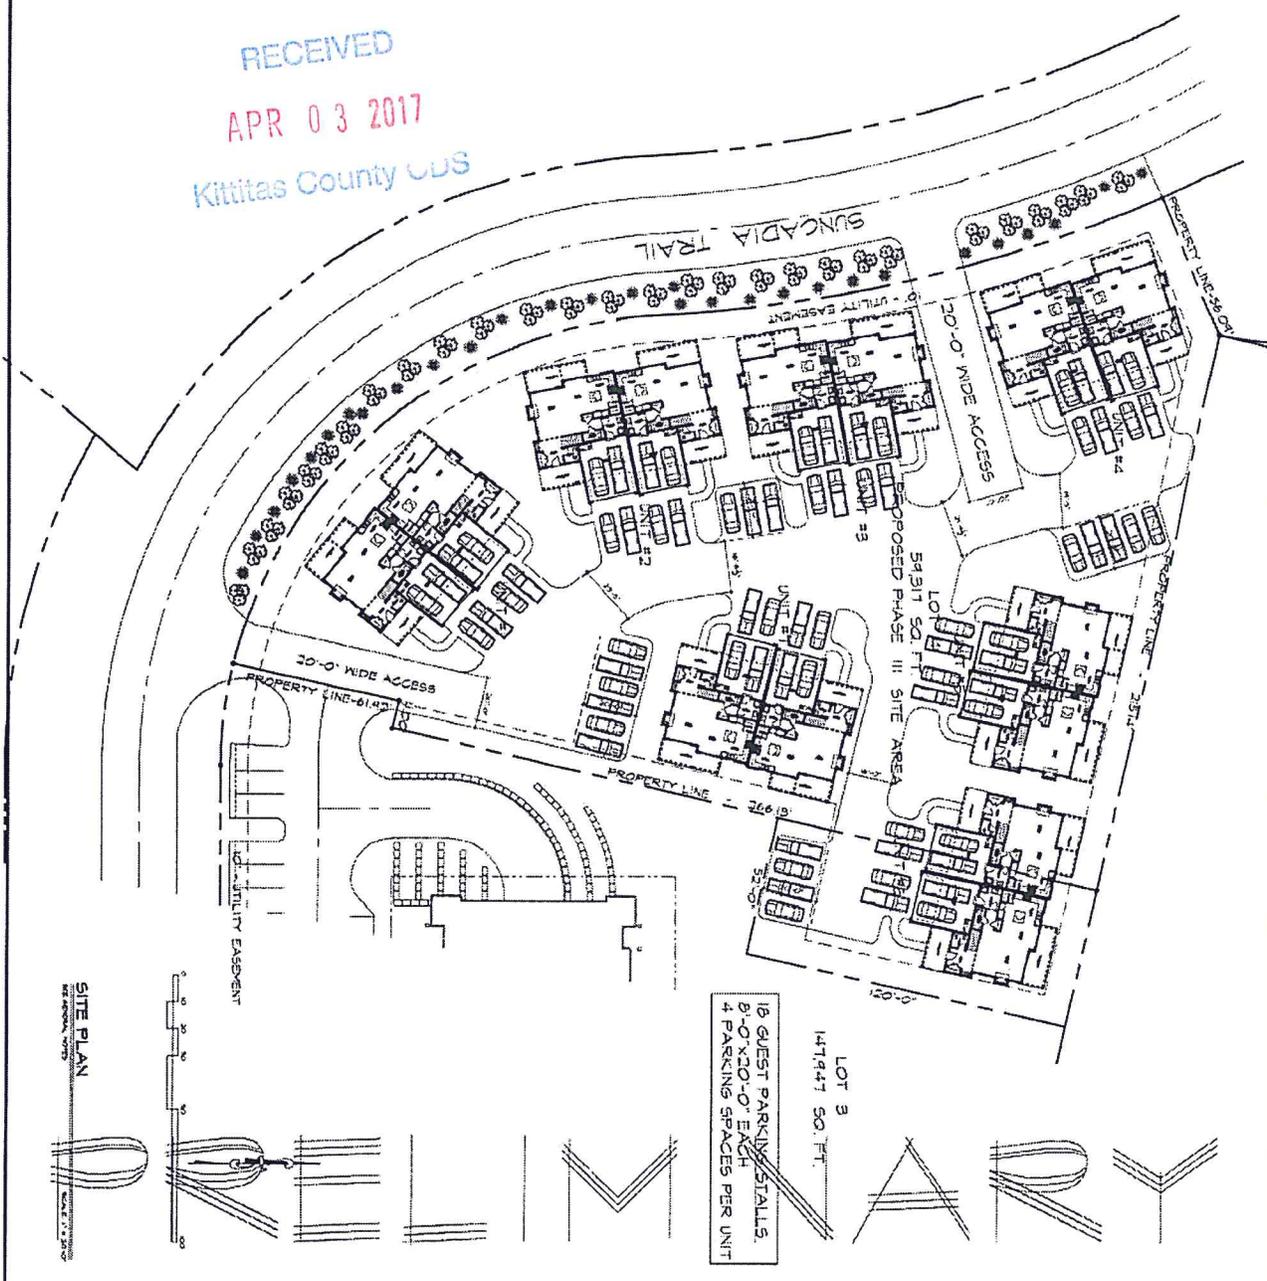

Please contact me if you have any questions.

Sincerely,

The proposed project consists of seven structures, each consisting of two attached residential townhomes. Information presented in this document pertains to the proposed roads, illumination, drainage, water and sewer facilities, and solid waste management program to serve the plat of Phase 1 Division 12.

Information on the proposed roads reflects the requirements of Exhibit J to the Development Agreement. Information on the storm drainage reflects the requirements of the Department of Ecology Stormwater Management Manuals, the 1999 Master Drainage Plan and preliminary stormwater engineering for Phase 1. Information of the proposed water supply, storage and distribution system, is taken from the June 2001 MPR Water System Plan and the July 2002 Reservoir, Pumping and Transmission Design Reports that were approved by the Washington State Department of Health and preliminary water system engineering performed for Phase 1. Information on the proposed sewage collection, treatment and disposal system is taken from preliminary engineering for Phase 1 and the March 2000 Site Engineering Technical Summary document for the MPR (Appendix A of the FEIS).

Discussed in this part are the classification of Phase 1 Division 12 roads, proposed road sections, roadway illumination and emergency access.

Roadway Classifications

Phase 1 Division 12 access road and parking shown in the Site Development Plan is classified as follows:

Road	Conceptual Master Plan Classification
Private	Private access and parking

Roadway Sections

The proposed roadway section for Phase 1 Division 12 shall be shown on the civil engineering documents.

Access

PRIMARY ACCESS: As illustrated on the General Site Plan, primary access to the Phase 1 Division 12 site from Bullfrog Road will be provided via Suncadia Trail. Suncadia Trail ties into Bullfrog Road southwest of Roslyn.

Illumination

Street lighting designs will conform to the principals of preserving dark skies while providing lighting levels appropriate for roadway safety and security. Street lighting will conform to the following planning criteria.

- a) Use of full-cutoff shielding on outdoor light fixtures;
- b) Mounting of light fixture luminaries at a height of not greater than 30 feet;
- c) Establishment of roadway lighting standards based on needed light distribution and the luminance of roadway surfaces;
- d) Use of high-pressure sodium (HPS) outdoor lights per change to C-26 approved by County Commissioners May 4, 2004;
- e) Use of timer or photo-cell controls to regulate when and where lighting would occur; and
- f) Avoiding unnecessary lighting of building facades

Streetlights will be located at intersections, pedestrian trail crossings, and other locations where needed. Alternative luminary styles will be considered during project design.

Introduction

The preliminary Stormwater Management Plan for Phase 1 Division 12 of the Suncadia Master Planned Resort (MPR) is described in this part. The Stormwater Management Plan reflects application of design guidelines detailed in the Department of Ecology Stormwater Management Manuals as well as information presented in the April 1999 (Rev. July 1, 1999) Master Drainage Plan (MDP) that was prepared by W&H Pacific for the MPR. The MDP outlines stormwater design procedures, guidelines, and protocols for the development.

Updates to the MDP include;

- (1) Adoption of the drainage standards set forth in Washington State Department of Ecology's Stormwater Management Manual for Western Washington August 2001 (DOE SMM) per the RIDGE Settlement Agreement Section 1.9 and
- (2) An addendum to the MDP dated August 2002 that provides (a) water quality protocol information for golf course areas that discharge to surface waters, and (b) revision of golf course water quality protocol summary information for infiltration to conform with the detailed protocol information.

Design specifics addressed in this part include:

- Stormwater runoff collection and conveyance
- Water quality treatment
- Overflow routing
- Conceptual Stormwater Plan

The proposed land use for the resort is shown in the General Site Plan for Phase 1. Phase 1 Division 12 is located west of the Prospector golf course in Phase 1 Division 2, bordering the golf course driving range, and south of Suncadia Trail. The Suncadia stormwater system will be privately owned, operated and maintained by the Suncadia Water Company. Construction of Division 12 facilities will be determined at the time of construction plan approval.

Conceptual Drainage Plan

Stormwater drainage for the Phase 1 Division 12 impervious areas will be collected in catch basins and conveyed via storm drainage pipes to the existing storm sewer infrastructure. Integral to this stormwater management concept is the update to the Master Drainage Plan for Phase 1.

The Phase 1 Division 12 project area soils are generally classified as Qgm – Bullfrog Moraine (glacial moraine deposits), till, group C.

Infiltration and Detention Facilities

No major infiltration or detention facilities are proposed on site. The proposed project will be conveyed to existing offsite stormwater control facilities.

Water Quality Treatment

Water quality treatment will be provided for runoff from impervious road and roof surfaces requiring stormwater treatment. Treatment can be provided in one of several Department of Ecology recommended treatment facility types. The water quality treatment option proposed for the Suncadia site will be a stormfilter system. All water quality facilities will be sized to treat the water quality storm. The water quality storm is that storm for which all storms equal or smaller in size account for 90 percent of the average annual runoff. For Phase 1, the water quality design storm is 1.68 inches in 24-hours. The water quality facility is described below.

Stormwater Management StormFilter System

Stormwater Management's StormFilter System is a Best Management Practice (BMP) designed to meet most federal, state, and local requirements for treating stormwater runoff in compliance with the Clean Water Act. The StormFilter, a passive, flow-through, stormwater filtration system, improves the quality of stormwater runoff from the urban environment before it enters receiving waterways by removing non-point source pollutants, including sediment (TSS), oil and grease, soluble metals, nutrients, organics, and trash and debris.

Overflow Routes

Each stormwater facility will have a controlled overflow structure. The overflow will discharge to an overflow drainage swale or enclosed pipe where it will be conveyed to a downstream facility or controlled dispersion area.

Source of Water Supply

Suncadia Resort Development, LLC, purchased and applied to the Kittitas County Water Conservancy Board (KCWCB) to transfer three Yakima River water rights (the Pautzke rights) for use on the MountainStar Master Planned Resort. The KCWCB approved the transfer of these rights on April 23, 2002. The Department of Ecology (Ecology) modified and affirmed the KCWCB decision on March 28, 2003. See Decisions KCWCB 01-07 / DOE CS4-YRB07CC01724 @1; KCWCB 01-5 / CS4-YRB07CC07124 @2; KCWCB 01-06 / CS4-YRB07CC01724 @3; and Ecology Letter Re: Trendwest Water Right Change Applications dated March 28, 2003.

The transfers as approved by the KCWCB and affirmed by Ecology designate the place of use of Suncadia's Yakima River water rights as the "area served by Suncadia resort Resources, Inc., now known as Suncadia Water Company, LLC, in accordance with a water system comprehensive plan or update approved by the Washington Department of Health" for domestic, irrigation and recreational use purposes. Combined, these transferred water rights allow the diversion of 9.5 cubic feet per second (cfs), 1,784.45 acre-feet per year during the April 1 through October 15 irrigation season and 4.09 cfs, 687.45 acre-feet per year from October 16 through March 31. Ecology further conditioned the rights to provide that the instantaneous diversion for the resort shall be limited to 8.7 cfs during the month of September and in drought years to 9.1 cfs (drought years are defined as when USBR pro-rates water to its Yakima Project contract customers). The authorized points of diversion are the City of Cle Elum's Yakima River Diversion (as primary source of supply), and Cle Elum's Cle Elum River Diversion (as secondary source of supply).

In addition, Suncadia, LLC has applied to the Department of Ecology to change the place of use, purpose of use and point of diversion of three irrigation purpose water rights (Lamb and Anderson rights) historically diverted from the mainstream Yakima River near the City of Ellensburg to allow for use of the water on the Suncadia Resort for municipal supply purposes and streamflow augmentation. Suncadia completed the purchase of the Anderson water rights in January, 2004, and has a contract to purchase the Lamb water rights contingent upon their transfer to the MPR. While the applications to change the water rights are pending, Suncadia has filed a motion with the Yakima Superior Court to authorize a change in purpose of use to instream flows and conveyance of the water rights to the State Trust Water Program for mitigation of consumptive water use or other cumulative impacts by the Suncadia Resort. The Yakima Superior Court enter an Order *Pendente Lite* approving the transfer of the Lamb and Anderson water rights to the State Trust Water Program for the pendency of the upper Yakima Basin adjudication on January 13, 2005, pending approval of a permanent change for use on the resort. Until transferred, the Order *Pendente Lite* allows use of these rights to mitigate an

additional 353.8 acre-feet per year of consumptive use during the April 1 through October 15 irrigation season.

In addition to the transfer of water rights and Order *Pendente Lite* from the mainstream Yakima River, Suncadia applied to Ecology to transfer eleven water rights in four Yakima River tributaries. These tributary water rights are to be transferred to instream flows in mitigation of impacts from the transfer and use of the Yakima River water rights. Ecology approved the transfer of water rights from two of the four tributaries, Big Creek and the Teanaway River, on May 10, 2002. Transfers of the two remaining tributaries, Swauk and First Creeks, were approved by Ecology on January 7, 2004. Ecology's transfer authorizations for Swauk and First Creek rights were appealed to the Yakima Superior Court. The appeal remains pending as of the date of this Plan. Suncadia, LLC has filed a motion with the Yakima Superior Court to authorize conveyance of all of its water rights from the four tributaries to the State Trust Water Program for mitigation of consumptive water use or other cumulative impacts by the Suncadia Resort for the 2005 and subsequent irrigation seasons which was approved by the Yakima Superior Court during its regularly scheduled Oversight Hearing on February 10, 2005. There are limitations imposed by Ecology on the consumptive use portion of the Pautzke water rights until the tributary rights are transferred to the State Trust Water Program. The tributary water rights and Suncadia's general mitigation strategy is discussed in more detail in Chapter 4 of the June 2001 WSP.

Phase 1 Division 12 System Description

The preliminary transmission and distribution system for Phase 1 Division 12 is illustrated on the enclosed Conceptual Utility Plan. The water for Phase 1 Division 12 will be supplied by the MPR water reservoirs. The reservoirs are located in the northeast section of the MPR.

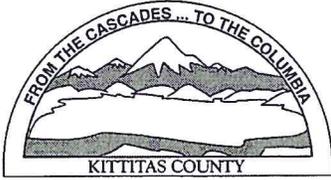

The project site will propose a looped 8-inch diameter main that will connect to the water main in Suncadia Trail. All homes are to be fire sprinklered on site. Hydrants will be placed at a maximum of 500 feet spacing. Fire flow calculations were developed using a flow of 1500 gallons per minute at 20 pounds per square inch (psi) pressure.

General Description

The proposed project consists of seven structures, each consisting of two attached residential townhomes. The collected raw wastewater from developed portions of Phase 1 Division 12 will be conveyed by means of on-site gravity sewers to the existing sanitary sewer system in Suncadia Trail and further continue to off-site gravity sewers to the Waste Water Treatment Plant (WWTP) in Cle Elum.

Suncadia Solid Waste Management Policy

Solid waste collection will comply with the Suncadia Solid Waste Management Plan.

 A PORTION OF SECTION 19, T. 20 N., R. 15 E., W.M.
 KITTITAS COUNTY, STATE OF WASHINGTON

GENERAL TESC NOTES:

- CONTRACTOR SHALL PROTECT ALL EXISTING SITE FEATURES AND UTILITIES UNLESS OTHERWISE SPECIFIED.
- APPROVAL OF THIS TEMPORARY EROSION AND SEDIMENTATION CONTROL (TESC) PLAN DOES NOT CONSTITUTE AN APPROVAL OF PERMANENT ROAD OR DRAINAGE DESIGN (E.G. SIZE AND LOCATION OF ROADS, PIPES, RESTRICTORS, CHANNELS, RETENTION FACILITIES, UTILITIES, ETC.).
- THE IMPLEMENTATION OF THESE TESC PLANS AND THE CONSTRUCTION, MAINTENANCE, REPLACEMENT, AND UPGRADING OF THESE TESC FACILITIES IS THE RESPONSIBILITY OF THE APPLICANT OR TESC SUPERVISOR UNTIL ALL CONSTRUCTION IS APPROVED.
- THE BOUNDARIES OF THE CLEARING LIMITS SHOWN ON THIS PLAN SHALL BE CLEARLY FLAGGED BY A CONTINUOUS LENGTH OF SURVEY TAPE (OR FENCING, IF REQUIRED) PRIOR TO CONSTRUCTION. DURING THE CONSTRUCTION PERIOD, NO DISTURBANCE BEYOND THE CLEARING LIMITS SHALL BE PERMITTED. THE CLEARING LIMITS SHALL BE MAINTAINED BY THE APPLICANT/TESC SUPERVISOR FOR THE DURATION OF CONSTRUCTION.
- THE TESC FACILITIES SHOWN ON THIS PLAN MUST BE CONSTRUCTED PRIOR TO OR IN CONJUNCTION WITH ALL CLEARING AND GRADING SO AS TO ENSURE THAT THE TRANSPORT OF SEDIMENT TO SURFACE WATERS, DRAINAGE SYSTEMS, AND ADJACENT PROPERTIES IS MINIMIZED.
- THE TESC FACILITIES SHOWN ON THIS PLAN ARE THE MINIMUM REQUIREMENTS FOR ANTICIPATED SITE CONDITIONS. DURING THE CONSTRUCTION PERIOD, THESE TESC FACILITIES SHALL BE UPGRADED AS NEEDED FOR UNEXPECTED STORM EVENTS AND MODIFIED TO ACCOUNT FOR CHANGING SITE CONDITIONS (E.G. ADDITIONAL SUMP PUMPS, RELOCATION OF DITCHES AND SILT FENCES, ETC.).
- ANY AREAS OF EXPOSED SOILS, INCLUDING ROADWAY EMBANKMENTS, THAT WILL NOT BE DISTURBED FOR TEN DAYS DURING THE WET SEASON OR FOURTEEN DAYS DURING THE DRY SEASON SHALL BE IMMEDIATELY STABILIZED WITH THE APPROVED TESC METHODS (E.G., SEEDING, MULCHING, PLASTIC COVERING, ETC.).
- ANY AREA NEEDING TESC MEASURES, NOT REQUIRING IMMEDIATE ATTENTION, SHALL BE ADDRESSED WITHIN FIFTEEN (15) DAYS.
- THE TESC FACILITIES ON INACTIVE SITES SHALL BE INSPECTED AND MAINTAINED A MINIMUM OF ONCE A MONTH OR WITHIN 48 HOURS FOLLOWING A STORM EVENT.
- STABILIZED CONSTRUCTION ENTRANCES AND ROADS SHALL BE INSTALLED AT THE BEGINNING OF CONSTRUCTION AND MAINTAINED FOR THE DURATION OF THE PROJECT. ADDITIONAL MEASURES, SUCH AS WASH PADS, MAY BE REQUIRED TO ENSURE THAT ALL PAVED AREAS ARE KEPT CLEAN FOR THE DURATION OF THE PROJECT.
- ANY PERMANENT RETENTION/DETENTION FACILITY USED AS A TEMPORARY SETTLING BASIN SHALL BE MODIFIED WITH THE NECESSARY EROSION CONTROL MEASURES AND SHALL PROVIDE ADEQUATE STORAGE CAPACITY. IF THE PERMANENT FACILITY IS TO FUNCTION ULTIMATELY AS AN INFILTRATION SYSTEM, THE TEMPORARY FACILITY MUST BE GRADED SO THAT THE BOTTOM AND SIDES ARE AT LEAST ONE FOOT ABOVE THE FINAL GRADE OF THE PERMANENT FACILITY.
- WHERE STRAW MULCH FOR TEMPORARY EROSION CONTROL IS REQUIRED, IT SHALL BE APPLIED AT A MINIMUM THICKNESS OF TWO INCHES.
- PRIOR TO APPLYING HYDROSEEDING MIX, THE AREA SHALL RECEIVE A LAYER OF TOPSOIL TO ENCOURAGE SEED AND PLANT GROWTH.
- THIS TESC IS CONSIDERED A PART OF THE STORM WATER POLLUTION PREVENTION REPORT FOR THIS PROJECT. THE CONTRACTOR SHALL RETAIN A COPY OF THE STORM WATER POLLUTION PREVENTION PLAN AND REPORT ON-SITE AT ALL TIMES.
- CONTRACTOR'S STAGING AREA AND STOCKPILE AREAS SHALL BE DETERMINED AND DESIGNATED PRIOR TO START OF CONSTRUCTION. CESCL TO COORDINATE AND MOVE THESE AREAS AS CONSTRUCTION PROGRESSES.
- ALL CONCRETE WORK AND SAWCUTTING SHALL FOLLOW DOE'S BEST MANAGEMENT PRACTICES.

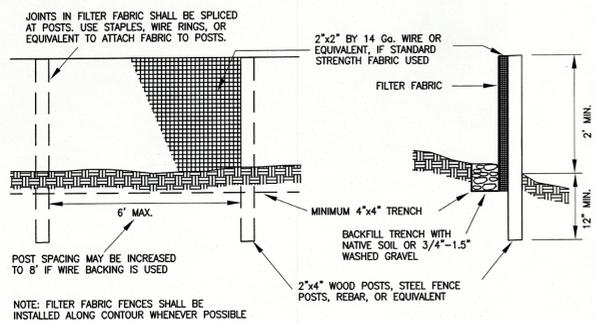

DUST CONTROL NOTES:

- THE APPLICANT SHALL BE RESPONSIBLE FOR CONTROLLING ALL FUGITIVE DUST THAT MAY BE GENERATED BY THE CONSTRUCTION PROJECT.
- WATER APPLIED TO CONSTRUCTION SITES FOR DUST CONTROL MUST NOT LEAVE THE SITE AS SURFACE RUNOFF.
- VEGETATE OR MULCH AREAS THAT WILL NOT RECEIVE VEHICLE TRAFFIC, IN AREAS WHERE PLANTING, MULCHING, OR PAVING IS IMPRACTICAL, APPLY GRAVEL OR LANDSCAPING ROCK.
- LIMIT DUST GENERATION BY CLEARING ONLY THOSE AREAS WHERE IMMEDIATE ACTIVITY WILL TAKE PLACE, LEAVING REMAINING AREA(S) IN THE ORIGINAL CONDITION, IF STABLE. MAINTAIN THE ORIGINAL GROUND COVER AS LONG AS PRACTICAL.
- CONSTRUCT NATURAL OR ARTIFICIAL WINDBREAKS OR WINDSCREENS. THESE MAY BE DESIGNED AS ENCLOSURES FOR SMALL DUST SOURCES.
- SPRINKLE THE SITE WITH WATER UNTIL SURFACE IS WET. REPEAT AS NEEDED TO PREVENT CARRYOUT OF MUD ONTO STREET. REFER TO STABILIZED CONSTRUCTION ENTRANCE (BMP C105).
- IRRIGATION WATER CAN BE USED FOR DUST CONTROL. IRRIGATION SYSTEMS SHOULD BE INSTALLED AS A FIRST STEP ON SITES WHERE DUST CONTROL IS A CONCERN.
- SPRAY EXPOSED SOIL AREAS WITH A DUST PALLIATIVE, FOLLOWING THE MANUFACTURER'S INSTRUCTIONS AND CAUTIONS REGARDING HANDLING AND APPLICATION. USED OIL IS PROHIBITED FROM USE AS A DUST SUPPRESSANT. LOCAL GOVERNMENTS MAY APPROVE OTHER DUST PALLIATIVES.
- RESPRAY AREA AS NECESSARY TO KEEP DUST TO A MINIMUM. WATER APPLIED TO CONSTRUCTION SITES FOR DUST CONTROL MUST NOT LEAVE THE SITE AS SURFACE RUNOFF.

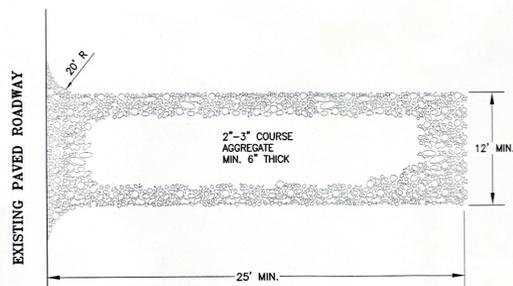

RECOMMENDED CONSTRUCTION SEQUENCE:

- PRE-CONSTRUCTION MEETING.
- INSTALL CATCH BASIN PROTECTION IF REQUIRED.
- GRADE AND INSTALL CONSTRUCTION ENTRANCE(S).
- INSTALL PERIMETER PROTECTION (SILT FENCE, BRUSH BARRIER, ETC.).
- CONSTRUCT SEDIMENT PONDS AND TRAPS.
- ROUGH GRADE AND STABILIZE CONSTRUCTION SITE.
- CONSTRUCT SURFACE WATER CONTROLS (INTERCEPTOR DIKES, PIPE SLOPE DRAINS, ETC.) SIMULTANEOUSLY WITH CLEARING AND GRADING FOR PROJECT DEVELOPMENT.
- MAINTAIN EROSION CONTROL MEASURES IN ACCORDANCE WITH PLANS & DOE "BEST MANAGEMENT PRACTICES".
- CONSTRUCT PROPOSED UTILITIES AND STRUCTURES. FINE GRADE SITE AS NEEDED.
- RELOCATE EROSION CONTROL MEASURES OR INSTALL NEW MEASURES SO THAT AS SITE CONDITIONS CHANGE THE EROSION AND SEDIMENT CONTROL IS ALWAYS IN ACCORDANCE.
- COVER ALL AREAS THAT WILL BE UNWORKED FOR MORE THAN FOURTEEN DAYS DURING THE DRY SEASON OR TEN DAYS DURING THE WET SEASON WITH STRAW, WOOD FIBER MULCH, COMPOST, PLASTIC SHEETING OR EQUIVALENT.
- STABILIZE ALL AREAS THAT REACH FINAL GRADE WITHIN SEVEN DAYS.
- SEED OR SOD ANY AREAS TO REMAIN UNWORKED FOR MORE THAN 30 DAYS.
- UPON COMPLETION OF THE PROJECT, ALL DISTURBED AREAS MUST BE STABILIZED AND BMP'S REMOVED IF APPROPRIATE.

CESCL:
T.B.D.

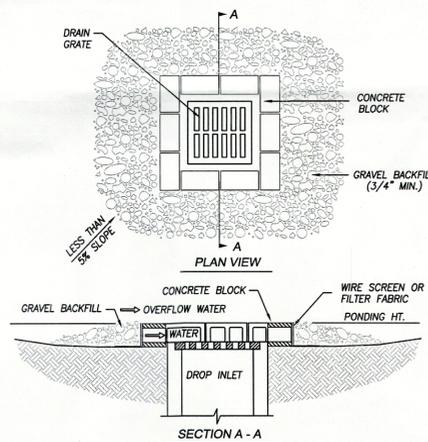

SILT FENCE DETAIL
N.T.S.

- NOTES:**
- THE ENTRANCE SHALL BE MAINTAINED IN A CONDITION THAT WILL PREVENT TRACKING OR FLOWING OF SEDIMENT ONTO PUBLIC RIGHTS-OF-WAY. THIS MAY REQUIRE TOP DRESSING, REPAIR AND/OR CLEANOUT OF ANY MEASURES USED TO TRAP SEDIMENT.
 - WHEN NECESSARY, WHEELS SHALL BE CLEANED PRIOR TO ENTRANCE ONTO PUBLIC RIGHT-OF-WAY.
 - WHEN WASHING IS REQUIRED, IT SHALL BE DONE ON AN AREA STABILIZED WITH CRUSHED STONE THAT DRAINS INTO AN APPROVED SEDIMENT TRAP OR SEDIMENT BASIN.

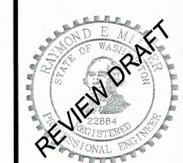

ROCK CONSTRUCTION ENTRANCE
N.T.S.

- NOTES:**
- DROP INLET SEDIMENT BARRIERS ARE TO BE USED FOR SMALL, NEARLY LEVEL DRAINAGE AREAS. (LESS THAN 5%).
 - EXCAVATE A BASIN OF SUFFICIENT SIZE ADJACENT TO THE DROP INLET.
 - THE TOP OF THE STRUCTURE (PONDING HEIGHT) MUST BE WELL BELOW THE GROUND ELEVATION DOWNSLOPE TO PREVENT RUNOFF FROM BY-PASSING THE INLET. A TEMPORARY DIKE MAY BE NECESSARY ON THE DOWNSLOPE SIDE OF THE STRUCTURE.

Thanks Dusty!

Would you mind approving this version too? I added the date so the price changed, and I also changed what it says under "Publication Date" and "PUBLISH" at the bottom.

Hope you have the best day!

Mr. Pilkington:

With drinking water being provided by Suncadia, who has sufficient capacity to serve 14 additional connections, DOH requires the following for serving water to these lots:

1. Suncadia needs to provide a Project Report that shows that the water system distribution piping, existing or proposed, can serve the water demands of these 14 additional connections while maintaining adequate pressures within the Suncadia water system.
2. Suncadia needs to provide Construction Documents (Design Drawings and Specification) of the water system distribution piping serving these lots, unless the piping infrastructure is already present.

Re: LP-17-00005

Dear Mr. Pilkington:

Thank you for opportunity to comment on the pre-threshold determination for the Phase 1 Division 12A development of 14 lots, proposed by Highway 9 Office Park Center LLC. We have reviewed the environmental checklist and have the following comment.

WATER QUALITY

Portable facilities permit coverage at construction sites. If a portable crusher, asphalt batch plant or portable concrete batch plant will operate at the site, the portable facility must have coverage under the sand and gravel permit for *portable facilities*. This permit covers industrial storm water and process water charges.

To apply for the permit, the proponent must submit an application electronically using Ecology's Water Quality Permitting Portal – Permit Coverage Notice of Intent (NOI) application, unless the applicant applies for and receives an Electronic Reporting Waiver from Ecology. Applicants that have received a waiver from Ecology must submit a completed and signed application to the appropriate regional Ecology office. To apply, click <http://www.ecy.wa.gov/programs/wq/sand/forms.html>. If the proponent does not have internet access, the proponent may call Cindy Huwe at (509) 457-7105 for application materials.

If you have any questions or would like to respond to these Water Quality comments, please contact **Pam Perun** at (509) 454-7869 or pamela.perun@ecy.wa.gov.

Sincerely,

Re: Archaeology - Survey Requested

Dear Ms. Pilkington:

Thank you for contacting the Washington State Historic Preservation Officer (SHPO) and Department of Archaeology and Historic Preservation (DAHP) and providing documentation regarding the above referenced project. The project parcel contains documented precontact and archaeological resources and it is probable that additional unidentified archaeological resources are present within the project area. It does not appear that the entire project area has been surveyed by a professional archaeologist. Please be aware that archaeological sites are protected from knowing disturbance on both public and private lands in Washington States. Both RCW 27.44 and RCW 27.53.060 require that a person obtain a permit from our Department before excavating, removing, or altering Native American human remains or archaeological resources in Washington. Failure to obtain a permit is punishable by civil fines and other penalties under RCW 27.53.095, and by criminal prosecution under RCW 27.53.090.

Chapter 27.53.095 RCW allows the Department of Archaeology and Historic Preservation to issue civil penalties for the violation of this statute in an amount up to five thousand dollars, in addition to site restoration costs and investigative costs. Also, these remedies do not prevent concerned tribes from undertaking civil action in state or federal court, or law enforcement agencies from undertaking criminal investigation or prosecution. Chapter 27.44.050 RCW allows the affected Indian Tribe to undertake civil action apart from any criminal prosecution if burials are disturbed.

We request a professional archaeological survey of the project area be conducted prior to ground disturbing activities. The completed survey must be sent DAHP and the interested Tribes for review prior to ground disturbance so that the requirement for DAHP permits and additional archaeological oversight can be determined. We also recommend consultation with the concerned Tribes' cultural committees and staff regarding cultural resource issues. 2

Thank you for the opportunity to comment on this project and we look forward to receiving the survey report. Should you have any questions, please feel free to contact me.

Sincerely,
