

The Division Chief

The Division Chief is a 36' high fire training tower incorporating features from both the Lieutenant and the Assistant Fire Chief. With a footprint spanning 16' wide x 36' long, the Division Chief features seven rooms for the ultimate in training. The maze room, comprised of 12 movable, slide-able, and lockable partitions, allows training officers to challenge trainees time after time by redesigning the room into any configuration. The tower's inset corner balcony offers a secure and realistic area to practice rappelling and laddering.
