Dusty - I am responding on behalf of KVFR. There are a grouping of these applications and collectively, they represent a significant development. I understand the reasons they are being presented separately but I would like the applicant and county to also acknowledge the cumulative impacts.

- Access roads – splitting these up seems to bypass the access road (2) requirement – KVFR desires to have 2 points of access to all developments for fire and life safety purposes.
- It is hard to tell if this proposal is for structures that are built with minimal separation? If so, KVFR would request that building materials and methods be required that mitigate structure to structure exposure risks.
- We understand that residential fire sprinkler systems will likely not be required but we request they be considered.

Thank you
