Pat,

Ridgecrest Drive was originally permitted to serve your project in 2015. According to our records, the approach was not paved within the timeframe allocated and therefore the permit is now void. With that said, WSDOT conceptually approves this access and will re-issue a permit for this access to serve your project when you are ready to apply. I have not had time to evaluate this location for turn lanes this week. As we discussed on the phone, you can expect conditions of access permit approval to potentially include right-turn channelization. Minor relocation of the approach may be necessary due to topographical restraints.
