SEPA ENVIRONMENTAL CHECKLIST FEE \$225.00

PURPOSE OF CHECKLIST:

The State Environmental Protection Act (SEPA), chapter 43.21C RCW. Requires all governmental agencies to consider the environmental impacts of a proposal before making decisions. An environmental impact statement (EIS) must be prepared for all proposals with probable significant adverse impacts on the quality of the environment. The purpose of this checklist is to provide information to help you and the agency identify impacts from your proposal (and to reduce or avoid impacts from the proposal, if it can be done) and to help the agency decide whether an EIS is required.

INSTRUCTIONS FOR APPLICANTS:

This environmental checklist asks you to describe some basic information about your proposals. Governmental agencies use this checklist to determine whether the environmental impacts or your proposal are significant, requiring preparation if an EIS. Answer the questions briefly, with the most precise information known, or give the best description you can.

You must answer each question accurately and carefully, to the best of your knowledge. In most cases, you should be able to answer the questions from your own observations or project plans without the need to hire experts. If you really do not know the answer, or if a question does not apply to your proposal, write "don not know" or "does not apply" Complete answers to the questions now may avoid unnecessary delays later.

Some questions ask about governmental regulations, such as zoning, shoreline and landmark designations. Answer these questions if you can. If you have problems, the governmental agencies can assist you.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

USE OF CHECKLIST FOR NONPROJECT PROPOSALS:

Complete this checklist for nonproject proposals, even though questions may be answered "does not apply." IN ADDITION, complete the SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS.

For nonproject actions, the references in the checklist to the words "project," "applicant" and "property or site" should be read as "proposal," "proposer" and "affected geographic are" respectively.

	TO BE COMPLETED BY APPLICANT	FOR STAFF USE
٠.	 BACKGROUND Name of proposed project, if applicable: Finley Rezone & 7-Lot Plat 	: <u> </u>
	2. Name of applicant: Stacy Finley	
	 Address and phone number of applicant and contact per 4352 Hawk St. San Diego, CA 92123 	on:
	 Date checklist prepared: October 8, 2007 	DEOEIVED
	 Agency requesting checklist: Kittitas County Community Development S 	RECEIVED JAN 29 2008

Kittitas County

6.	Proposed timing or schedule (including phasing, if applicable):	
	No phasing involved. Preliminary approval expected in the winter of 2007. Final approval expected in the spring of 2008.	
	Do you have any plans for future additions, expansion, or further activity ated to or connected with this proposal? If yes, explain.	
	No.	
	List any environmental information you know about that had been prepared, will be prepared, directly related to this proposal.	1.30
	No other environmental information has been prepared that I am aware of.	
9.	Do you know whether applications are pending for governmental approvals	
<i>,</i>	of other proposals directly affecting the property covered by your proposal? If yes, explain.	
	No.	
10	List and accomment approvals on normits that will be needed for your	
10.	List any government approvals or permits that will be needed for your proposal, if known.	
	I am seeking a rezone and 7 lot plat approvals from Kittitas County.	
		3.711.0.3.3.3.2
11	Circa brief complete description of your proposal including the proposad uses	
11.	Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist	
	that ask you to describe certain aspects of your proposal. You do not need to repeat	
	those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)	
	The application is for a "project rezone" per KCC 17.98.020. I am	
	seeking approval of a rezone from Ag-20 to Ag-5 along with a 7 lot plat	
	on 40.81 acres.	
12.	Location of the proposal. Give sufficient information for a person to understand	
	the precise location of your proposed project, including a street address, if any,	
	and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan,	
	vicinity map, and topographic map, if reasonably available. While you should submit any	
	plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.	
	The subject property is located off of Sorenson Road in Section 29,	
	Township 17N, Range 20E in Kittitas County. The associated parcel	
	number is 17-20-29000-0018. Plat maps, a vicinity map and legal	
	description are included in the application package.	

B.	<u>EN</u> 1.	IVIRONMENTAL ELEMENTS Earth	
		a. General description of the site (circle one): flat, rolling, hilly, steep slopes, mountainous, other.	
		 b. What is the steepest slope on the site (approximate percent slope)? +/- 3% across the site 	
		c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any prime farmland. Soils include: loam, sand & gravel.	
		 d. Are there surface indications or history of unstable soils in the immediate vicinity? No. 	
		e. Describe the purpose, type, and approximate quantities of any filing or grading proposed. Indicate source of fill. Some fill will be required for the road. Quantities have not been calculated at this time. f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe. No.	
		 g. About what percentage of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)? 5-8% 	
		h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any: Erosion control measures will be in place at the time of road construction.	
2.	AIR	a. What types of emissions to the air would result from the proposal (i.e. dust, automobiles, odors, industrial wood smoke) during construction and when the project is completed? If any, generally describe and give approximate quantities if known.	
		Dust from construction equipment.	
		b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.	
		No.	
		c. Proposed measures to reduce or control emissions or other impacts	
		to air, if any:	
		Sprinkling may be used to control wind erosion during construction.	

a. Surface 1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If year, describe type and provide names. If appropriate, state what streams or river it flows into. Irrigation ditches flow through the property down hill to service other properties. The subject property is serviced by the KRD. 2) Will the project require any work over, in or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans. Not at this time. 3) Estimate the fill and dredge material that would be placed in or removed from surface water or wetlands, and indicate the area of the site that would be affected. Indicate the source of fill material. No materials will be moved around the vicinity of the ditches or any other water feature. 4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known. No surface withdrawals, KRD must approve a distribution plan for irrigation. 5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan. No 6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge. No b. Ground 1) Will ground water be withdrawn, or will water be discharged to surface waters? If so, give general description, purpose, and approximate quantities if known. Exempt well or a single group B may be constructed 2) Describe waste materials that will be discharged into the ground from sepit canks or other sources, if any (for example: domestic sewage; industrial, containing the following chemicals; agricultural; etc.). Describe waste materials that will be discharged into the ground from sepit canks or other sources, if any (for example: domestic sewage; industrial, containing the following chemicals; agricultural; etc.). Describe the general size of the system, the numbe	3.	WATER		
of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If year, describe type and provide names. If appropriate, state what streams or river it flows into. Irrigation ditches flow through the property down hill to service other properties. The subject property is serviced by the KRD. 2) Will the project require any work over, in or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans. Not at this time. 3) Estimate the fill and dredge material that would be placed in or removed from surface water or wetlands, and indicate the area of the site that would be affected. Indicate the source of fill material. No materials will be moved around the vicinity of the ditches or any other water feature. 4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known. No surface withdrawls. KRD must approve a distribution plan for irrigation. 5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan. No 6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge. No b. Ground 1) Will ground water be withdrawn, or will water be discharged to surface waters? If so, give general description, purpose, and approximate quantities if known. Exempt well or a single group B may be constructed 2) Describe waste materials that will be discharged into the ground from septic tanks or other sources, if any (for example: domestic sewage; industrial, containing the following chemicals.;; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of such systems the general size of the system, the number of such systems. Each practed will have its own septic system 2. Water Runoff (including storm water): 1) Describe the source of much lith have t		a.		
lakes, ponds, wetlands?? If yes, describe type and provide names. If appropriate, state what streams or river it flows into. Irrigation ditches flow through the property down hill to service other properties. The subject property is serviced by the KRD. 2) Will the project require any work over, in or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans. Not at this time. 3) Estimate the fill and dredge material that would be placed in or removed from surface water or wetlands, and indicate the area of the site that would be affected. Indicate the source of fill material. No materials will be moved around the vicinity of the ditches or any other water feature. 4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known. No surface withdrawls. KRD must approve a distribution plan for irrigation. 5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan. No 6) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan. No b. Ground 1) Will ground water be withdrawn, or will water be discharged to surface waters? If so, describe the type of waste and anticipated volume of discharge. No b. Ground 1) Will ground water be withdrawn, or will water be discharged to surface waters? If so, give general description, purpose, and approximate quantities if known. Exempt well or a single group B may be constructed 2) Describe waste materials that will be discharged into the ground from septic tanks or other sources, if any (for example: domestic sewage; industrial, containing the following chemicals; agricultural; etc.). Describe the source of month (including storm water). C. Water Runoff (including storm water). 1) Describe the source of month of the waters? If so, describe. Most stormwater will be absorbed and ditching along roads

Ground 1) Will ground water be withdrawn, or will water be discharged to surface waters? If so, give general description, purpose, and approximate quantities if known. Exempt well or a single group B may be constructed 2) Describe waste materials that will be discharged into the ground from septic tanks or other sources, if any (for example: domestic sewage; industrial, containing the following chemicals; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve. All waste materials will be held in taks designed and installed by lissened installers. Each parcel will have its own septic system c. Water Runoff (including storm water): 1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe. Most stormwater will be absorbed and ditching along roads				
removed from surface water or wetlands, and indicate the area of the site that would be affected. Indicate the source of fill material. No materials will be moved around the vicinity of the ditches or any other water feature. 4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known. No surface withdrawls. KRD must approve a distribution plan for irrigation. 5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan. No 6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge. No b. Ground 1) Will ground water be withdrawn, or will water be discharged to surface waters? If so, give general description, purpose, and approximate quantities if known. Exempt well or a single group B may be constructed 2) Describe waste materials that will be discharged into the ground from septic tanks or other sources, if any (for example: domestic sewage; industrial, containing the following chemicals; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve. All waste materials will be held in taks designed and installed by lissened installers. Each parcel will have its own septic system c. Water Runoff (including storm water): 1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe. Most stormwater will be absorbed and ditching along roads			3) Estimate the fill and dredge material that would be placed in or	
the site that would be affected. Indicate the source of fill material. No materials will be moved around the vicinity of the ditches or any other water feature. 4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known. No surface withdrawls. KRD must approve a distribution plan for irrigation. 5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan. No 6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge. No b. Where will this water flow? Will this water flow into other waters? If so, describe. Most stormwater will be absorbed and ditching along roads				
If so, describe. Most stormwater will be absorbed and ditching along roads				
Most stormwater will be absorbed and ditching along roads				

	2) Could waste materials enter ground or surface waters? If so, generally describe.No	
d. water in	Proposed measures to reduce or control surface, ground, and runoff mpacts, if any: None proposed at this time	
<u>PLANTS</u>		
a.	Check or circle types of vegetation found on the site:	
\frac{1}{\fint}}}}}}}}}}}}}}}}}}}}}}}}}}}}}}}}}}}}	deciduous tree: alder, maple, aspen, other evergreen tree: fir, cedar, pine, other shrubs grass pasture crop or grain wet soil plants: cattails, buttercup, bulrush, skunk cabbage, other water plants: water lily, eelgrass, milfoil, other other types of vegetation:	
b.	What kind and amount of vegetation will be removed or altered? Grasses for driveways and home sites.	
c.	List threatened or endangered species known to be on or near the site. None observed	
d. preserve	Proposed landscaping use of native plants, or other measures to or enhance vegetation on the site, if any: None proposed	
ANIMAL a. the site	$\frac{S}{C}$ Circle any birds and animals which have been observed on or near or are known to be on or near the site:	
✓	birds: hawk, heron, eagle, songbirds, other: mammals: deer, bear, elk, beavers, other: fish: bass, salmon, trout, herring, shellfish, other:	
b. the site.	List any threatened or endangered species known to be on or near None observed	
c.	Is the site part of a migration route? If so, explain. No	
d.	Proposed measures to preserve or enhance wildlife, if any. None proposed	

4.

5.

6.	a. will t it wi	What kinds of energy (electric, natural gas, oil, wood stove, solar) be used to meet the competed project senergy needs? Describe whether all be used for heating, manufacturing, etc. ctricity, wood stoves, propane	
	b.	Would your project affect the potential use of solar energy by tent properties? If so, describe.	
	impa	What kinds of energy conservation features are included in the plans is proposal? List other proposed measures to reduce or control energy cts, if any. ne proposed	
7.	a. toxic	RONMENTAL HEALTH Are there any environmental health hazards, including exposure to chemicals, risk of fire and explosion, spill, or hazardous waste, that doccur as a result of this proposal? If so, describe.	
		 Describe special emergency services that might be required. None Proposed measures to reduce or control environmental health hazards, if any. None proposed 	
	b.	Noise 1) What types of noise exist in the area which may affect your project (for example, traffic, equipment, operation, other)? None that would affect the project	
		2) What types and levels of noise would be created by or associated with the project on a short-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site. Construction equipment, temp. vehicle traffic	
		 Proposed measures to reduce or control noise impacts, if any. Limit hours of construction per Kittitas County Code 	
8.	LANE a.	O AND SHORELINE USE What is the current use of the site and adjacent properties? Agriculture and surrounded by ag related practices	
	b.	Has the site been used for agriculture? If so, describe. yes hay production	
	c.	Describe any structures on the site. One home exists on the site.	
	d.	Will any structures be demolished? If so, what?	6 of 10

	e.	What is the current zoning classification of the site?	
	f.	Ag-20 What is the current comprehensive plan designation of the site?	
		Rural	
	g. designa	If applicable, what is the current shoreline master program tion of the site?	
		Not applicable	W. M
	h.	Has any part of the site been classified as an:	
	11.	environmentally sensitive area?	
		No	
	i.	Approximately how many people would the completed project displace?	
		None	
	:		
	j. project?	Approximately how many people would reside or work in the completed 5-7 families	
	k.	Proposed measures to avoid or reduce displacement impacts, if any.	
		None proposed	
		1. Proposed measures to ensure the proposal is compatible with	
		existing and projected land uses and plans, if any. The project proposal is consistant with the comp plan and KCC	
		The project proposar is consistant with the comp plan and NCC	
9.	Housin		
	a. whether	Approximately how many units would be provided, if any? Indicate high, middle or low-income housing.	
		iddle to upper income	
	b.	Approximately how many units, if any, would be eliminated?	
	-	whether high, middle or low-income housing.	
	None		
	c.	Proposed measures to reduce or control housing impacts, if any.	
		at this time. No impacts are expected	
10			
10.	AESTHE a.	What is the tallest height of any proposed structure(s), not including	
		s; what is the principal exterior building material(s) proposed?	
	Limite	ed to the zone	
	b.	What views in the immediate vicinity would be altered or obstructed?	
	None		
	c.	Proposed measures to reduce or control aesthetic impacts, if any.	
	None	•	
	140110		
11.	LIGHT A	AND GLARE	
	a.	What type of light or glare will the proposal produce? What time	
	10.00	would it mainly occur?	
	Lights	s from homes mostly at night	
	b.	Could light or glare from the finished project be a safety hazard or	
	No. T	here is nat a viewshed ordinance in this county	ie.

	interfere with views?	<u> </u>
	c. What existing off-site sources of light or glare may affect your proposal?	
	None	
	d. Proposed measures to reduce or control light and glare impacts, if any.	
	None proposed	-
	None proposed	
_		Manager Control
2.	RECREATION What designated and informal recreational appartunities are in the	
	a. What designated and informal recreational opportunities are in the immediate vicinity?	
	Camping, hiking, snow mobiling, hunting, fishing	
	Camping, many, snow mobiling, naming, noming	
	b. Would the proposed project displace any existing recreational uses?	
	If so, describe.	-
	No	
	c. Proposed measures to reduce or control impacts on recreation,	-
	including recreation opportunities to be provided by the project or applicant,	
	if any:	
	No impact reduction required.	
3.	HISTORIC AND CULTURAL PRESERVATION	
	a. Are there any places or objects listed on, or proposed for, national,	
	state, or local preservation registers known to be on or next to the site? If	-
	so, generally describe.	
	No	
	b. Generally describe any landmarks or evidence of historic,	
	archaeological, scientific, or cultural importance known to be on or next to the site.	
	None exist on site.	
	None exist on site.	
	c. Proposed measures to reduce or control impacts, if any.	
	None proposed	
4.	TRANSPORTATION	
	a. Identify public streets and highways serving the site, and describe	
	proposed access to the existing street system. Show on site plans, if any.	
	The subject propsert is served off of Sorenson Road, a county road.	
	b. Is site currently served by public transit? If not, what is the	
	approximate distance to the nearest transit stop?	
	No. The nearest is in Ellensburg, 5 miles away.	
	c. How many parking spaces would the completed project have? How	
	many would the project eliminate?	
	The project would not create any new parking spaces.	

	d. Will the proposal require any new roads of streets, of improvements to existing roads or streets, not including driveways? If so, generally describe (indicate whether public or private). None predicted.	
	e. Will the project use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe. No	
	f. How many vehicular trips per day would be generated by the completed project? If known, indicate when peak volumes would occur.	
	Between 50-75 DPT	
	 Proposed measures to reduce or control transportation impacts, if any. None proposed. 	
5.	PUBLIC SERVICE a. Would the project result in an increased need for public services (for example: fire protection, police protection, health care, schools, other)? If so, generally describe. No	
	 Proposed measures to reduce or control direct impacts on public services, if any. None proposed 	
6.	UTILITIES a. Circle utilities currently available at the site; electricity natural gas, water refuse services (elephone, sanitary sewer, septic system, other.	
	b. Describe the utilities that are proposed for the project, the utility providing the services, and the general construction activities on the site or in the immediate vicinity which might be needed. PSE, Ellensburg Telephone, Propane Services	
C.	SIGNATURE The above answers are true and complete to the best of my knowledge. I understand that the its decision.
