Subject: RE: SX-25-00002 PSE HWY Cable Remediation Project- Notice of Application

CAUTION: This email originated from outside the Kittitas County network. Do not click links, open attachments, fulfill requests, or follow guidance unless you recognize the sender and have verified the content is safe.

Hello,

This compliance review is in response to the application **SX-25-00002 PSE HWY Cable Remediation Project**, for the replacement of 949 linear feet of existing electrical cables in a new conduit.

The proposed undertaking is outside of the traditional territories of the Colville Confederated Tribes, but it falls within high probability for the potential presence of cultural resources according to the Washington State Department of Archaeology and Historic Preservation's (DAHP) statewide predictive model. The undertaking also proposes utilizing an open trenching method, which is a significant ground disturbing activity.

We recommend the project area be surveyed by a professional archaeologist prior to any ground disturbing activities occurring. If a cultural resource survey is undertaken, we would like to request a copy of the resulting survey report for our review and comment. We also recommend that the proponent have a completed Inadvertent Discovery Plan (IDP) on hand prior to any ground disturbing activities.

Thank you,

Jordan Bovee | Archaeology Technician, MA
