PROJECT DESCRIPTION

The applicant is proposing a manufactured home and appurtenance on the parcel.

THIS DEVELOPMENT IS EXEMPT PURSUANT TO WAC 173-27-040(2)(g), and KCC 17B.07.030(2)(g): A SHORELINE SUBSTANTIAL DEVELOPMENT PERMIT IS NOT REQUIRED FOR THIS PROJECT.

THE FOLLOWING CONDITIONS ARE REQUIRED PURSUANT WAC 173-27:

1. All work shall substantially conform to the specifications of the site plan and application materials submitted to Kittitas County Community Development Services by Leah Tuominen on December 8, 2025.
2. Issuance of this shoreline exemption permit does not authorize access onto private property or waive other jurisdictional agency requirements. The permittee shall obtain consent from respective property owner(s) prior to entering onto private property and shall obtain and comply with all applicable federal and state permit requirements in completing the proposed development.
3. Should ground disturbing or other activities related to the proposed project result in the inadvertent discovery of cultural or archaeological materials, work shall be stopped in the immediate area and contact be made with the Washington State Department of Archaeology and Historic Preservation (DAHP) and the Yakama Nation Fisheries. Work shall remain suspended until the findings are assessed, and appropriate consultation is conducted. Should human remains be inadvertently discovered, as dictated by Washington State RCW 27.44.055, work shall be immediately halted in the area and contact made with the coroner and local law enforcement in the most expeditious manner possible.
4. Except as exempt in KCC 14.05.060, no grading or filling upon a site involving more than one hundred (100) cubic yards shall be performed without a grading permit from the County Engineer or Public Works designee (KCC 14.05.050). An application for grading in excess of five hundred (500) cubic yards shall be accompanied by an engineered grading plan (KCC 14.05.080).
5. The applicant shall obtain a Flood Development Permit for any activities within the floodplain from Kittitas County Public Works and adhere to all requirements of this permit.
6. Issuance of this shoreline exemption will not create liability on the part of Kittitas County or any officer or employee thereof, for any on or off-site injury or damage that may result from this project.
7. The applicant shall complete a site evaluation with Kittitas County Public Health to determine a suitable location for On-Site Sewage and submit an updated site plan to the Community Development Services Planning Department for approval prior to building permit submittal.

9. The applicant shall submit a planting plan to enhance the area located east of the “Potential Wetland Flags” shown on the site plan submitted with the Shoreline Application on December 29, 2025. The planting plan shall include a site plan and a brief narrative describing the type and location of vegetation planted. The planting plan does not have a required quantity unless any woody vegetation, including trees, is removed during construction. If any woody vegetation is removed, it should be replaced at a 2:1 ratio.
10. If any proposed development, including, but not limited to, the on-site sewage system or the placement of the manufactured home, is located within or encroaches upon a potential wetland area, the applicant must submit a Critical Areas Report. This report must be reviewed and approved prior to the issuance of a building permit.

CONSISTENCY ANALYSIS

A shoreline substantial development permit is not required for the project as described due to an exemption allowed pursuant to WAC 173-27-040(2)(g), KCC 17B.07.030(2)(g). Although exempted by statute/rule, such exempt developments must comply with all other regulatory requirements of the Shoreline Management Act and Kittitas County Shoreline Master Program.

- Nothing in these regulations shall obviate any requirement to obtain any permit, certificate, license, or approval from any state agency or local government (See Revised Code of Washington 90.58.360).
- The Development will comply with all applicable provisions of Kittitas County Code.
- Please note this parcel will be completely within the special flood hazard area when the Easton Reach LOMR is approved. The building permit must be issued before the LOMR becomes effective, or KCC 14.08 standards will be required for this project.
- All development shall take place outside the 115-foot buffer or more from the Ordinary High-Water Mark.

Approved by: Ellie Myers, Planner I

Date of Issuance: 12/30/2025
