Re: SD-22-00001

Dear Kelly Bacon:

Thank you for the opportunity to comment on the Notice of Application for the North Jetty Cove Project. We have reviewed the application and have the following comment.

SHORELANDS

Dredge or fill below the ordinary high water mark of a Water of the United States may require an individual or general (nationwide) permit from the U.S. Army of Corps of Engineers (Corps). We advise the applicant to contact the Corps to determine if a permit is needed.

The State regulates discharges into Waters of the State (including wetlands) under the Water Pollution Control Act, RCW 90.48, and Section 401 of the Clean Water Act. They could require Ecology's review and authorization.

In order to minimize construction impacts on wetlands, Best Management Practices (BMPs) for sediment and erosion control should be implemented. This should include functional silt fences and immediate revegetation.

Please contact Lori White at (509) 379-1917 or lori.white@ecy.wa.gov should you have any questions or would like to discuss the above comments.

Sincerely,

Tricia Sawyer
