Subject: McIntosh Well #1; PWS ID #AD452; Kittitas County
Group A-TNC; DOH Project #16-0708; APPROVAL

Dear Mr. McIntosh:

The Group A-TNC Application for the above project received in this office July 19, 2016 together with updates received in August and September of 2016, has been reviewed and, in accordance with the provisions of WAC 246-290, is hereby APPROVED.

As required in WAC 246-290-040 – Within sixty days following the completion of, and prior to the use of the above project or portions thereof, the attached Construction Report must be completed by a professional engineer and returned to this department.

WAC 246-290-120 provides if the certification of completion has not been submitted within two years of the date of this letter, this approval will become null and void unless you take action at that time to arrange for an extension of the approval period in the manner prescribed.

Approval of this water system has been conditioned upon the management or ownership of the water system by a Satellite Management Agency.

WAC 246-290-990 authorizes a schedule of fees to be implemented for review of planning, engineering, and construction documents. The Department of Health's (DOH) total cost to review the engineering report is \$633.00. An invoice is enclosed.

Based upon the information submitted, upon receipt of the completed construction completion report form (see enclosed) the number of approved connections will be set at two (one full-time residence serving 3 residents and one commercial building serving 200 persons 62 days per year).

Please note that the water system is expected to permit additional new connections in a manner consistent with this project or your approved water system plan, or both, so that physical capacity and water rights are not exceeded.
