Good Morning Ellie,

I think we need to amend our requirements for the short plat for SP-25-00011. If there is a working septic on site they are welcome to use it for the two parcels. They will have to give us documentation that this system will meet the size of the system that the septic system can support. We have documentation that the house is a 3 bedroom and the shop is a 1 bedroom, but the size of the septic system only meets a 3 bedroom.

Once the system meets the size requirements that are required for state code, and the easement is recorded with the auditor's office granting the parcel owners access to the septic system on the adjacent parcel, they will meet our recommendations and be given final approval.
