Hi Bradley,

My apologies for the delayed response, I have been out of town for the past couple weeks. Attached is a site plan showing locations of proposed work, excavation will exceed 500 CY. We are currently assembling an engineered grading permit application to submit for this project. We previously spoke with Josh regarding this project, he said it was ok to submit the SEPA to get a jump start on the timeline, with the engineered grading permit submission to follow.

Thank you,

Joel Greear

Hi Joel,

I left you a second voicemail today. I wanted to follow up with an e-mail in case it was easier for you to respond to the e-mail. I'm looking for two things from you that would help us out a fair bit.

1. Can you send me a site plan of the driveway, home site and shop? That would help me understand where on the property the home & shop will be located and how much of the driveway you're widening.
2. The amount of excavation that will be occurring to widen the road. The SEPA flexible threshold is 500 cubic yards.

Best,

Bradley
