Eric,
I didn't realize until I picked up Bradley that my initial response just came through today. I thought I sent it last week, but apparently it did not go through. My apologies for that and the additional confusion.

The good news is that Bradley and I measured from the Ordinary High Water Mark (OHWM) of Cabin Creek toward the work area and all of the proposed work is outside of the Shoreline jurisdiction because the work occurs more than 200' from the OHWM.

Thanks all and again, my apologies for the hiccup in communication; I have no idea how that happened.
Jen

Thanks Jen. FYI that next Monday is Labor Day, so are you sure that's when you'll be meeting up?

Copying Justin so he can attend if possible. Thanks.

Bradley and I just spoke and plan to meet in town on Monday at 12:30 and head up to the site to define the OHWM of Cabin to determine the best path forward for the Shoreline jurisdiction.

Hi Eric,

No worries. Thanks for the follow up and setting me up with your email.

Hi Jen, I'm out of the office this afternoon, but am back in tomorrow. Happy to catch up by phone as well.

Best,
Bradley

Hi Bradley,

Thanks for the email. I apologize for not getting back to your voicemails, I keep putting it on my list to call you back then more literal fires pop up....

I've copied Jen Nelson with WDFW. She's who we've been working with on this project for habitat stuff.

Jen, this is a question I got from Bradley: "Specifically, I'd like to discuss how you determined that the project area is outside of shoreline jurisdiction. *The county GIS mapping system is not displaying this shoreline area correctly so the determination of shoreline impacts would likely need to be made by a measurement from the Ordinary High-Water Mark of Cabin Creek.* Were you able to connect with the WA Dept of Ecology, WA Dept of Fish & Wildlife or some other professional who was able to identify the Ordinary High-Water Mark of Cabin Creek?

Could you provide some commentary?

Thanks.

Eric Koenig
