

Shoreline Conditional Use Permit Project Narrative

Wanapum Right Bank Slope Stabilization

32. Answer the following questions on a separate sheet and attach to this application packet.
- a. That the proposed use is consistent with the policies of RCW 90.58.020 and the Master Program
 - Yes, proposed use is consistent with the policies of RCW 90.58.020 and the Master Program
 - b. That the proposed use will not interfere with the normal public use of public shorelines
 - Slope stabilization is located on Grant County PUD lands and therefore will not interfere with the normal public use of public shorelines.
 - c. That the proposed use of the site and design of the project is compatible with other authorized uses within the area and with uses planned for the area under the comprehensive plan and SMP
 - Rip-rap is present along the shoreline both upstream and downstream of the proposed project location.
 - d. That the proposed use will cause no significant adverse effects to the shoreline environment in which it is to be located
 - No significant adverse effects to the shoreline environment are anticipated as a result of this project.
 - e. That the public interest suffers no substantial detrimental effect
 - Protecting the shoreline will help preserve lands and will not impact public access to shorelines. Therefore, no detrimental effects are anticipated as a result of this project.
 - f. That if conditional use permits were granted for other developments in the area where similar circumstances exist, the cumulative impact of such uses would remain consistent with the policies of RCW 90.58.020 and not produce substantial adverse effects to the shoreline environment.
 - No substantial adverse effects to the shoreline environment are anticipated due to the cumulative impact from the surrounding rip-rap along the shoreline.
 - g. That the proposed use has been appropriately conditioned to prevent undesirable effects of the proposed use and to assure consistency of the project with the Act and the local Master Program.
 - No undesirable effects of the rip-rap installation are anticipated as a result of this project.
 - h. When converting from one nonconforming use to a different nonconforming use, the applicant must demonstrate that no reasonable alternative conforming use is practical and that the proposed use will be at least as consistent with the policies and provisions of the Act and the Master Program and as compatible with the uses in the area as the pre-existing use.
 - N/A

35. Will the proposed use be consistent with the policies of RCW 90.58.020 and the Kittitas County Shoreline Master Program? (attach additional sheets if necessary)

- Yes, proposed use is consistent with the policies of RCW 90.58.020 and the Master Program.

36. Provide any additional information needed to verify the project's impacts to shoreline ecological functions:

- Rip-rap is present along the shoreline both upstream and downstream of the proposed project location. The District does not foresee any impacts to shoreline ecological functions as a result of this project.
