Hi Igor,

That should be ok. Once the SEPA process has concluded and you inform us whether you have retained or modified the determination, we will begin our review.

Hi Jeremy, attached are SEPA checklist and determination. And this morning I received \$4260 check from our accounts payable department. We would like to send original SCUP, SEPA documents along with the check to your department sometime this week with the understanding that you will not start your review until 2 week SEPA process is completed (Oct 21). Please let me know if this is acceptable to you. Thank you,

Igor Shaporda

Subject: SEPA Environmental Checklist & MDNS for the Wanapum Right Bank Stabilization Project

Good afternoon,

Attached please find a SEPA Environmental Checklist and a Mitigated DNS for Public Utility District No. 2 of Grant County, Washington's (Grant PUD's) proposed Wanapum Dam Right Bank Stabilization Project. Grant PUD is proposing

to armor approximately 300 yards of shoreline on the right (west) bank from avian tower 4 to the Wanapum Dam. This work will be completed landward of the Ordinary High Water Mark and completed during low/normal flows so no in-water will occur. In May 2018, due to high run off flows of the Columbia River, the right bank near the Wanapum avian tower 4 required emergency stabilization. The shoreline was armored 100 yards downstream and 100 yards upstream of avian tower 4. Rip rap (~24 inch diameter) will be added to provide stability to the remaining 300 yards of shoreline to prevent further erosion and damage to the avian tower.

Comments can be provided to Ross Hendrick, Senior Manager of Environmental Affairs at PO Box 878, Ephrata, WA 98823 or at Rhendr1@gcpud.org.

Thanks!

Deb Firestone
