I met with Marc Kirkpatrick and Mark Wenger this morning to discuss the next steps for the short plat. The project currently has a tabled road variance waiting for additional information. They plan to submit additional information for the variance for inclusion on the October 21 meeting.

I also explained that this project will not be able to go on indefinitely and there will be a deadline for the submission of information necessary to reach preliminary approval. I suggest that we give them until Oct 30th to submit the additional information for the variance, at a minimum.

If they are successful at receiving the variance, I will need to see a revised plat prior to preliminary approval that contains all of the info requested in the attached document.
