Subject: industrial land

Linda Huber,

I write with concern related to Kittitas Counties ability to welcome business, growth and jobs. I am working for a client who would, under the right circumstances, re-locate his business to our area. So far I have been unable to locate enough available land suitable for the light industrial needs of my client. I believe that it would be beneficial to the County in whole to inventory the industrial and light industrial zone property and determine if the availability of additional land is needed.

The particular project my client is involved with could provide 60 good, living wage jobs, something that is vitally important and sorely lacking in our community. As a County, we have sent these jobs away for far too long, while other communities benefit from the revenue these jobs provide. I urge your support on this critical matter.

Thank you for your consideration,

Dean Curtis
