

Burn better with a new wood stove

Aloa Mitchell of Thorp replaced her old inefficient wood stove with a new one through a HopeSource program. Now she saves money and we all breathe easier in the Kittitas Valley.

If wood is your primary heat source and you live in Kittitas County (some restrictions apply), call us to find out how HopeSource could help pay the costs of replacing your old uncertified stove with a new clean-burning wood stove or ductless heat pump.
