

## **Revision of Kittitas County Health Order: Stay at Home Phase 2 of the Safe Start Washington Re-opening Plan**

According to RCW 70.05.070(3), the Health Officer will control and prevent the spread of any dangerous, contagious or infectious diseases that may occur within his jurisdiction.

An outbreak of the disease caused by 2019 Novel Coronavirus (COVID-19), especially within vulnerable populations, poses an immediate threat to public health and safety of the residents of Kittitas County and Washington State.

Kittitas County Health Officer, Mark Larson, MD, is requiring that all residents of Kittitas County stay at home except as permitted in Phase 2 of the Safe Start Washington re-opening plan, found [here](#). The variance allowing Kittitas County to move from Phase 1 to Phase 2 was granted by Washington State Secretary of Health, John Wiesman, DrPH, on Wednesday, May 27, 2020.

RCW 70.05.120(4): Any person violating any of the provisions of chapters 70.05, 70.24, and 70.46 RCW or violating or refusing or neglecting to obey any of the rules, regulations or orders made for the prevention, suppression and control of dangerous contagious and infectious diseases by the local board of health or local health officer or administrative officer or state board of health, or who shall leave any isolation hospital or quarantined house or place without the consent of the proper health officer or who evades or breaks quarantine or conceals a case of contagious or infectious disease or assists in evading or breaking any quarantine or concealing any case of contagious or infectious disease, is guilty of a misdemeanor, and upon conviction thereof shall be subject to a fine of not less than twenty-five dollars nor more than one hundred dollars or to imprisonment in the county jail not to exceed ninety days or to both fine and imprisonment.

### **THIS ORDER HEREBY REQUIRES:**

To protect public health, the Health Officer orders all individuals living in Kittitas County to stay at home or at their place of residence except as permitted in Phase 2 of the Safe Start Washington re-opening plan, found [here](#). In addition, and in consultation with the Kittitas County Emergency Management Department, the Health Officer may order cessation of any of the aforementioned exemptions, if necessary, to protect the health and well-being of Kittitas County residents.

**The revision of this order is effective as of Monday, June 1, 2020 at 12:00 a.m. and shall continue in effect until Wednesday, June 10, 2020 at 11:59 p.m., unless modified or rescinded. It shall be reviewed every 10 days to determine the need to continue this order and renewed as needed.**

In all phases of the Safe Start Washington re-opening plan, all individuals should continue to maintain physical distancing, wear face coverings to protect others, stay home when sick, wash hands, cover coughs and sneezes, avoid touching the face with unwashed hands, and disinfect surfaces regularly.

In all phases, employers are required to maintain physical distancing for employees and patrons or provide alternative prevention measures when physical distancing is not possible for a particular job task. Employers must also provide necessary sanitation, hygiene, and disinfection measures. Additional requirements can be found in the Safe Start Washington re-opening plan, found [here](#). The intent of this order is to ensure that the greatest number of people in Kittitas County remain in their places of residence to the maximum extent feasible, while maintaining essential services and allowing for the safe, phased re-opening of additional services in [Phase 2](#), to slow the spread of COVID-19 as much as possible. As this emergency continues, it is essential to continue to slow virus transmission as much as possible to protect the most vulnerable residents of Kittitas County and to prevent the healthcare delivery system from being overwhelmed.

When people need to leave their places of residence, whether to obtain or perform vital services, return to work, or to otherwise facilitate authorized activities necessary for basic life functions, they should at all times, as reasonably possible, comply with physical distancing requirements. All provisions of this order should be interpreted to effectuate this intent. Failure to comply with any of the provisions of this order constitutes an imminent threat to public health.

To the extent individuals are using shared or outdoor spaces, they must at all times, as reasonably possible, maintain physical distancing of at least six feet from any other person when they are outside their residence. Social distancing requirements are waived for household members.

People at high risk of severe illness from COVID-19 and people who are sick are urged to stay in their residence to the extent possible except as necessary to seek medical care.

For the purposes of this order, individuals may leave their residence to perform essential activities, including tasks essential to their health and safety, or to the health and safety of their family or household members (including, but not limited to, pets), such as, by way of example only and without limitation, obtaining medical supplies or medication, visiting a healthcare professional, or obtaining supplies they need to work from home. For the purposes of this order, individuals may leave their residence to work for or obtain services at any healthcare operation, including but not limited to hospitals, clinics, pharmacies, healthcare suppliers, home healthcare services, behavioral health providers, and veterinary care.

Permitted activities include those necessary to obtain vital services or supplies for themselves and their family or household members, or to deliver those services or supplies to others, such as, by way of example only with without limitation, canned food, dry goods, fresh fruits and vegetables, pet supply, fresh meats, fish, and poultry, and any other household consumer products, and products necessary to maintain the safety, sanitation, and essential operation of residences.

In addition, allowable activities can include physical activity, such as, by way of example and without limitation, walking, hiking, running, bicycling, swimming, and camping (with household members only), provided the individuals comply with physical distancing requirements. Other allowable activities may include caring for a family member or pet in another household.

*To Protect and Promote the Health and the Environment of the People of Kittitas County*

For businesses subject to environmental health regulations, inspections of such business establishments will continue to ensure compliance with this order and other applicable regulations. If a business or establishment licensed or permitted by the Kittitas County Public Health Department is found in violation of this order, that business's or establishment's permit and/or license may be revoked.

All Kittitas County businesses must have safety plans and protocols for the protection of employees and the public they serve. These plans should take into consideration physical distancing requirements, limiting customer capacity, altering business practices to include delivery or pickup, cleaning and disinfection protocols, and the use of personal protective equipment (PPE) as necessary. These plans are intended to allow businesses and organizations to safely operate or resume operation at the earliest allowable date while decreasing community transmission of COVID-19, as well as the possibility of clusters or outbreaks specific to any one business or organization that could be detrimental to the success of that agency.

Essential travel and limited nonessential travel for Phase 1 and 2 permissible activities are allowed, including but not limited to travel by foot, bicycle, scooter, motorcycle, automobile, or public transit. Other nonessential travel, or traveling for nonpermitted activities, is prohibited. Travel is distinct from physical activity, which is permissible as described above.

All public and private, indoor and outdoor gatherings of more than five people beyond a single household or living unit per week are prohibited.

All residents of Kittitas County shall assist and comply with these directives until further notice. Kittitas County residents will be notified of this order via press release and more.

Any aggrieved person can petition the Kittitas County Superior Court for release from this Health Order. This Health Order shall become final unless, no later than ten (10) days after the Health Order is served, any person aggrieved by the order requests in writing an appeal before the Board of Health according to Kittitas County Code Chapter 13.75.070.
