

Priority #1

CRP 270-16: Teanaway Rd Hydraulic Improvement, Phase 2: Lick Creek
Location: North Fork Teanaway Rd, Cle Elum
Last Updated: July 27th, 2021

Project Number: RC1569-B1

Length: 0.30 miles

Basis for Project: Hydraulic Improvement

Construction: July-November 2021

Project Description: The primary purpose is to remove existing undersized culverts and replace them with a concrete box culvert over Lick Creek. This will improve storm water drainage and fish passage while also reducing pavement damage and maintenance costs during high water events. This is the second phase of the Teanaway Rd Hydraulic Improvement project. Storie Creek was completed in 2019.

Status: Construction work has begun

Contractor: J&K Earthworks

Traffic Impacts: Construction is scheduled to take 20 weeks. A single lane, restricted bypass road has been built to accommodate vehicles during construction. No vehicles over 45 ft in length on the bypass road.

Funding Sources:

FLAP/
FHWA \$950,000

Local
Funds \$314,000

Total: \$1,264,000
