Meeting was called to order at 1:30 pm

GIS/Long Range Planning Project Update

Director Carlson briefed the Board of County Commissioners with a list of long range planning work items and priorities. Some include updates to the critical areas ordinance which are on schedule to be updated by the end of 2020. The Shoreline Master Program is also due for an update and is due by the end of June 2021. The new Long Range Planner who is starting March 2, 2020 will also be responsible to update the Capital Improvement Program. This update would include both County owned facilities along with private districts facilities. Under the Growth Management Act the county is responsible to keep inventory of the private districts facilities but not necessarily the projects. Currently, IT is working with stakeholders to create a tool to use in conjunction with GIS. Director Carlson is going to work with the Planning Commission to get their input on what those inputs should be.

The meeting was adjourned 2:38 p.m.
