

Fowler Creek Ranch

CU-23-00003

The map shows a well. How much water is he allowed. There two more pumps that are pumping water up two Grant creek homes.

Who gave permission to build a dam to block up the water in the wet land? EPA or the county. I never seen a sepa report. The dam was built to keep his wells primed.

The wet land water runs into Fowler creek our water rights class A. The dam should ~~be~~ be breached.

I don't see any plans for sewage of any kind for the amount of proposed cabins and camper spaces.

The existing roads on the south east corner are coming from my property. They are fire trails and used for local fire wood.

A few year's Ago a bike club was
denied a permit To run their bikes on
The Power line

Traffic would be another problem
weekend on Wastside Rd would
cause backup on Fowler Creek Rd
