Hello Jeremiah,

This consult is in reference to Short Plat Project *SP-23-00003 Hauglum*. No Ground Disturbance is expected at this time. Plat divisions are indicative of future development such expansions lead to ground disturbing activities and will require additional consultation(s) with the THPO.

This undertaking is located within the CCT Usual and Accustom. We request any undertakings, particularly those involving ground disturbing activities, to have an IDP in place prior to implementation.

The proposed project lies within the traditional territory of the Moses-Columbia Tribe, 1 of the 12 constituent tribes of the Confederated Tribes of the Colville Reservation (CTCR), which is governed by the Colville Business Council (CBC). The CBC has delegated to the Tribal Historic Preservation Officer (THPO) the responsibility of representing the CTCR with regard to cultural resources management issues throughout the traditional territories of all of the constituent tribes under Resolution 1996-29. This area includes parts of eastern Washington, northeastern Oregon, the Palus territory in Idaho, and south-central British Columbia.

If ground disturbing activities are to be conducted, such as the installation of a septic system or the scraping of a driveway, a cultural resource surface survey and sub-surface testing of the area in and directly around the proposed ground disturbance are recommended as a surface observation will not be an accurate assessment of the existent potential for subsurface cultural deposits. This test should be to the terminal depth of the septic installation to ensure the totality of the presence or absence of cultural material.

Please be advised that a documented Traditional Cultural Property (TCP) is located less than one mile from the proposed project.

TCPs are places important to the CTCR for the preservation and continuation of the community's traditional lifestyle. TCPs can be, but are not limited to, religious areas, sacred areas, resource gathering areas (plant, animal, fish, and mineral), places associated with stories and legends, archaeological and ethnographic sites, habitation sites, camp sites, pictograph and petroglyph locations, special use sites, trails, and places with Indian names.

For native people, natural resources are cultural resources. Traditional cultural plant resources are not only cherished for fiber, food, medicine, and building material, but are an intrinsic aspect of indigenous sovereignty; these plants link the people of the present to the people of the past.

There are known cultural resources of historic and pre-contact significance nearby and the division of this particular plat is considered Very High Risk for an inadvertent discovery according to the DAHP predictive model.

CCT requests a cultural resource survey of the parcel(s) and CCT requests during implementation that there be an inadvertent discovery plan or (IDP) in place to ensure compliance with all Section

106 and relevant cultural resource laws both federally and to the state of Washington. See attached IDP.

Thank you for consulting with the Colville Confederated Tribes History and Archaeology Program.

Sincerely,

Connor Armi | Archaeologist Senior MA, RPA

Good morning,

Good morning,

CDS Is requesting comment on the following 2-lot short plat application: **SP-23-00003 Hauglum**. Links to the file materials can be found below. **The comment period will end Friday, June 16, 2023 at 5pm (PDT)**. CDS will assume your agency does not wish to provide comment if not received by this date. Please let me know if you have any issues accessing the materials.

Internal Access: SP-23-00003 Hauglum

External Access: [SP-23-00003 Hauglum](#)

If the links above do not work, please go to the CDS website at: <https://www.co.kittitas.wa.us/cds/land-use/default.aspx> and navigate to “Short Plats” and then the Project File Number “SP-23-00003 Hauglum”.

Thank you.

Jeremiah Cromie
