

Dear Kittitas County Community Development Services,

We would like to build an overhang so our garage is not blocked by snow. When the snow falls off the roof landing in our driveway, it creates a wall of snow and ice. This barrier is very difficult to remove. The new overhang will slant away from the driveway preventing the snow & ice build up. Our goal is to allow us to get in and out of our garage in the winter months.

Thank you!

Mark Zulen
