

To Protect and Promote the Health and the Environment of the People of Kittitas County

September 28, 2023

Chace Pederson
Kittitas County Community Development Services
411 N. Ruby Street
Ellensburg, Wa. 98926

Dear Chace,

So long as everything that was submitted in the application is true. Public Health requirements for ACU-23-00004 ACX are as follows:

The parcel has a current on-site septic system permitted with Public Health for a bathroom only inside a shop. If no additions or alterations to this system are planned, then no on-site septic permit would be required through Public Health. If any additions or alterations are planned the system would need to be brought to current state and local standards. We would recommend the septic tank be pumped and the system inspected by a qualified individual prior to use.

The parcel is currently serviced by a well. Public Health has no requirements for water however would recommend a nitrate and bacteriological test.

If you have any questions, please don't hesitate to give me a call.

Sincerely,

A handwritten signature in black ink, appearing to read "Dan Suggs", written in a cursive style.

Dan Suggs, B.S
