RE: Game Farm Cluster Plat Application
 P 05-07

The County has received the referenced application for a cluster plat. Preliminary plat approval is contingent upon provisions for an irrigation water right-of-way for each parcel. In addition, completed irrigation water distribution facilities may be required if the subject property is classified as irrigable by said Irrigation District per RCW 58.17.310.

Enclosed, find a copy of the original preliminary plat drawing. Accordingly, please notify our office in writing of any requirements so that administrative actions may be complete in a timely manner. **Failure to respond to this notice within two (2) weeks shall be interpreted as no action required.**
