

Bowers Field
Parcel Combination Application

Project Narrative

The purpose of this application is to remove a lot line, thus turning two smaller parcels (0.18 Ac. Each) into a single larger parcel (0.36 Ac.).

This is to provide a larger lease area for an aircraft storage hanger at the Bowers Field Airport.

There are no structures, septic fields, or water supply currently onsite. The physical nature of the site consists of natural grasses and weeds, surrounded by asphalt taxiways. The adjacent parcels also do not contain any improvements.
