

Sign Permit Application

Site Plan and Description of Proposed Signs:

2 Signs – see details below

Mock-up of Proposed Sign on South Facing Wall of Main Hanger. Currently this is where the Midstate sign is located. It would be removed and replaced with the proposed sign.

One is for the south exterior wall of the hangar. The approximate **size** is 4 feet high by 32 feet long. It will be 3/16-inch aluminum panels with 3M vinyl graphics. It would **weigh** approximately 285 pounds. It would be **fastened** to the metal siding with 2X4 boards in the same fashion as the existing Mid State Aviation sign. It will not extend more than 12 inches from the wall.

The south exterior wall length (200 ft) & peak of building is 28 ft 2 1/16 inches.

Mock-up of Proposed Sign on West Facing Wall of Main Hanger

The second sign is for the west exterior wall of the hangar. The approximate **size** is 4 feet high by 16 feet long. It will be 3/16-inch aluminum panels with 3M vinyl graphics. It would **weigh** approximately 75 pounds. It would be **fastened** to the metal siding with 2X4 boards in the same fashion as the Mid State Aviation sign on the south wall. It will not extend more than 12 inches from the wall.

The west exterior wall length (100 ft) & peak of building is 20 ft 1 7/16 inches.

Project Narrative:

Request is to hang 2 signs at 1101 Bowers Road. Details regarding size of signs, sign materials, elevation of land is approximately 1,540 feet, length and peak of building are provided above.
