To: Kittitas County Community Development Services

I am a neighbor to a proposed grow facility Project on Radar Road.

Our area is traditional ag, more so than most of the valley or county. A contention I have is growing Marijuana an agriculture crop, I doubt it. Shouldn't this grow project be in a commercial zoned area.

The devaluation of neighboring property is a great concern. Check with local Realtors. You have already allowed one grow facility on Naneum Road with in 1/2 mile of this proposed site. What a view this is to the neighbors.

By count according to one report there will be over 40 buildings here to start with and more to come.

I won't even start with the potential crime that we've been assured won't come. Ya B.S.

Our county did not vote in favor of the Marijuana Law, it was passed primarily by western Washington, let them grow it there.

In the long term do you really believe the tax revenue will take care of the associated costs coming from this product. (Crime, drug rehab, property devaluation)

I don't care what the EIS study says, this is a very bad choice of location, please reconsider this plan.

If you don't I can foresee a legal action in the near future.

Thank you for your time
