Dusty,

The attached letter represents notes from today's meeting with the project proponents. Based upon notes shown in the letter, WDFW believes the stream in question is typed correctly (as a Type N stream) and the culvert is already of sufficient length that it will not need to be altered during construction. BMPS described are also believed to be adequate to protect the stream during construction if used.

Let me know if you need anything else from us regarding this. I also gave my business card to Vernon for him to contact us if he has further questions on the streams in this area.

Scott

Dusty,

WDFW has some questions about the amount of work near the stream on this project and whether the stream has been correctly typed (fish or non-fish). Please relay these concerns to the applicant and get back to me on clarification of the work near the stream.

Thanks,

Scott

Greetings all,

I sent the SEPA determination out the other day, and I thought I would provide an easy way to access all the relevant information. Click the link below.
