I don't think so I just told her the use of the site really isn't changing from how we use it today.

Dusty and Luke,

I missed the deadline for comments, but am curious exactly where in this parcel the stockpile area will be located. It doesn't appear there's too much room for that much material with all of the wetlands, Mercer Creek, and airport nearby. I see you plan to keep all storm water onsite—that's great! I just wanted to make sure you were aware that a KRD delivery runs along Hungry Junction, but Mercer Creek crosses Hungry Junction east of Stephanie Rd then cuts diagonally southeast toward Look Road. I think your existing area is near the location where Mercer meets Look and begins running south. Will it be enlarged?

I saw a note about soil berm and ditch to Mercer Creek so I just wanted to try and touch base with you even though I'm past the comment period. The LIDAR pretty clearly shows several swales crossing Hungry Junction and Look Road and headed straight for this parcel. Do you have more details on where the berms will be located or how much grading you'll have to do to prep the stockpile area?

I'd love to come up with a plan to reduce flood risks for the airport, road infrastructure, and private infrastructure while improving habitat in Mercer Creek. Let's put that on our "to-do" lists! ☺

Thanks for your consideration,  
Jen
