REVISED MITIGATED DETERMINATION OF NONSIGNIFICANCE

File: SE-18-000010: WA DNR West Fork Teanaway Bridge

Description: Replacement of Bridge

Proponent: WA Department of Natural Resources

Location: The project is located approximately 3 miles northeast of Cle Elum.

Lead Agency: Kittitas County Community Development Services

The lead agency for this proposal has ~~determined that it will not have a probable significant adverse impact on the environment~~ has revised its SEPA threshold determination of Non-significance issued on December 31, 2018 after comment from the Washington Department of Fish and Wildlife, and the Washington Department of Ecology. An environmental impact statement (EIS) is not required under RCW 43.21C.030(2)(c). This decision was made after review of a completed environmental checklist and other information on file with the lead agency. This information is available to the public on request, or can be viewed at the Kittitas County Community Development Services website at <http://www.co.kittitas.wa.us/cds/land-use/default.aspx> under "Miscellaneous SEPA Applications".

The lead agency has determined that certain mitigation measures are necessary in order to issue a Revised Mitigated Determination of Non-Significance (MDNS) for this proposal. Failure to comply with the mitigation measures identified hereafter will result in the issuance of a Determination of Significance (DS) for this project. The mitigation measures include the following:

Earth

- 1) Bridge replacement work shall occur during dry conditions for erosion reduction.
- 2) Bridge and approaches shall be designed to minimize excavation and embankment, and approaches shall be compacted.
- 3) North bridge approach design shall retain fill with abutment structure, and be armored with large angular rock.
- 4) Straw shall be applied to exposed soils after bridge replacement.

Air

- 1) Crushed rock surfacing shall be employed to control dust.

Water

- 1) Best Management Practices shall be employed, including, but not limited to:
 - Pumping encountered water from excavation site where forest floor dispersion will occur
 - Use of petroleum free hydraulic oils in equipment working in or near water
 - Keeping spill containment kit on site for each piece of equipment
 - Sediment delivery prevention methods such as silt fencing filter fabric and check dams.
- 2) No fill or dredge material will be placed or removed from surface waters or wetlands.

- 3) All work will be consistent with the Forest Practices Hydraulic Project approval issued by the Washington Department of Fish and Wildlife issued on September 24, 2018.

This Revised MDNS is issued under WAC 197-11-340(2); the lead agency will not act on this proposal for 15 days. Any action to set aside, enjoin, review, or otherwise challenge this administrative SEPA action on the grounds of noncompliance with the provisions of Chapter 43.21 RCW, shall be commenced on or before February 14, 2019 to the Kittitas County Board of Commissioners, Rm. 108, County Courthouse, Ellensburg, WA 98926.
