To whom it may concern;

I am writing in opposition to Brown and Jackson (SE-20-00003) proposed storage ponds (sewage ponds) on parcel 295134. This type of septage has no business anywhere near residential or agricultural communities. In the proposed area there are many residences within 1 or 2 miles. We not want the stink, (and you know that it will be pungent at times), the blowing in the air from dried waste spread on the land (this is a windy area and it will blow quite extensively) and the potential contamination of our ground water. Human waste should not be spread on agricultural land. It is full of heavy metals, drugs, and disease. How the county can even consider permitting this is beyond absurd. Who writes the laws that would permit this insanity. We already have to live with the awful stink of the shut down silage dump up the road on Vantage highway. On many nice quiet evenings the aroma is disgusting, at best. Please reject this proposal as not in the best interest of the community in which it would be located. If this is considered a Utility with no environmental impact by Kittitas county codes, then you need to rewrite your codes.

Sincerely,

Paul R. Kjosness
