Subject: Proposed Ponds Off Parke Creek Road
Date: Monday, August 24, 2020 3:39:19 PM

Has an environmental impact study been done on this proposal? Why weren't nearby property owners notified directly? Something a little more than a notice in the newspaper would have been more local government friendly. I would suggest the county slow down a bit in selling off and further polluting our county. And as a local government entity, I also suggest you work more closely with the citizens and land owners of the county. If not, you may find yourself out of a job in the near future.
