RE: Brown & Jackson SEPA application (SE-20-00003)
Parcel number 295134

Dear Kelly Bacon,

We are in opposition to the approval of this application.

We own 300 acres near this location. 150 acres is on the corner of Fox Rd and Lyons Rd and is currently in alfalfa hay production. Directly across the road, we own 150 acres on the east side of Fox Rd and Christensen Rd...the road that leads directly to the property where this SEPA application is being applied for. This 150 acres of our property is currently in alfalfa hay production as well, but is sub divided into 15 building sites.

We have farmed this property since the spring of 2012 and may one day in the distant future, develop the land into home sites. Our acreage offers some of the most beautiful views of this valley and those building sites are considered to be in a prime location. We feel as though the use that Brown & Jackson is planning for the property covered by this SEPA application will have a negative affect on the value of all property in the surrounding area. We are concerned about water quality for land below this property as well as any offensive odors that applying biosolids may produce. Will any of these biosolids contain any pharmaceutical residuals from the human waste?

If we were looking at purchasing a home site in this valley, I would not want to be located close to land that is used for the disposal of septage.

We ask that you deny this application until you have a full discussion with the impacted property owners.

Sincerely,

Trinity Farms
Mike Forman, President
