The proposal is for the installation and supply of power to the main power supply panel to service new fish screens. The project will include an emergency backup generator (with concrete foundation and containment), a 12.47 kV/480 V transformer/breaker/automatic transfer switch assembly (with concrete foundation and containment) and storm drainage. The project is located at Rosa Diversion Dam, located on the Yakima River along State Route 821, in Section 33, Township 15N, Range 19E, W.M. in Kittitas County.

The lead agency for this proposal has determined that the proposal will not have a probable significant adverse impact on the environment. This decision was made after review of a SEPA environmental checklist and other information on file with the lead agency, after considering voluntary mitigation measures which the lead agency or the applicant will implement as part of the proposal, and after considering mitigation measures required by existing laws and regulations that will be implemented by the applicant as part of the Kittitas County permit process. The responsible official finds this information reasonably sufficient to evaluate the environmental impact of this proposal. The complete application file is available to the public on request or may be viewed at Kittitas County Community Development Services at 411 North Ruby St, Suite 2 Ellensburg, WA 98926, or on the county website. <http://www.co.kittitas.wa.us/cds/land-use/default.aspx> (Miscellaneous SEPA Applications, file number SE-21-00010).
