Hi Kelly,

From my review of the documents, it appears that the owners have discussed the on-site sewage portion of this expansion with Kittitas County Public Health. However, I am concerned that the expansion (specifically the addition of restrooms and food service) will require a large on-site system and push the facility into DOH jurisdiction. If expected peak daily wastewater flows are greater than 3,500 gallons per day, the applicant will be required to expand their current on-site system and meet the requirements of WAC 246-272B.

Kathryn Hayden, P.E.

Environmental Engineer – LOSS Program
Wastewater Management Section
Office of Environmental Health and Safety

Kelly:

Upon determining the identity (per drinking water) of this applicant, DOH ODW has the following comment:

- The water system is approved for one (1) connection and has one (1) active connection. At this time, DOH cannot tell if the water system has capacity to serve additional water demands of an expansion of their facilities. DOH requires submittal of a Capacity Analysis, completed by a Professional Engineer licensed in the State of Washington.

If anyone has any questions or concerns, please contact DOH.

Thanks,

Russell E. Mau, PhD, PE

Kelly:

The Department of Health (DOH) Office of Drinking Water (ODW) has reviewed this application and has the following comments:

- The applicant indicates that drinking water service will “continue and be maintained by present provider”. DOH is seeking the name of the water system, so that we can assess capacity.
- Depending on the status of the water system providing service, DOH may have follow-on comments.

If you have any questions or concerns, please contact DOH, thanks,

Russell E. Mau, PhD, PE
