Kelly,

The water system that serves this project receives an operating permit from the Department of Health. I read a comment from that office that stated a capacity analysis is needed prior to any expansions of the water system. Kittitas County Environmental Health Department requires that floor plans of the new Subway be submitted to our office for review to be sure all foodservice requirements are met prior to construction. Additionally, the applicant must have a designer or engineer determine the new septic GPD for this project and determine if the current system can handle the proposed total GPD. If updates to this system need to be made they will need to start the on-site septic process with Kittitas County Public Health. If the updated project GPD is 3500 gallons or greater the applicant will need to work with Washington State Department of Health to setup up a LOSS septic system to accommodate the facility's needs.

Thank you for this opportunity to comment.

Holly Erdman
