Kelly,

It appears that the driveway improvements are crossing 3 Type 4 streams, these would be Type N (non fish-bearing) streams. WDFW is interested in the work over and around these streams, but could find no details in the application regarding the culvert for proposed work or sizing. If the road is being widened, potentially the culverts would either be getting replaced or extended at these creek locations. WDFW would like to examine the culvert sizing to ensure that we are providing adequately sized culverts to protect downstream habitat which do eventually lead to fish-bearing waters.

If the applicant has information on the proposed culvert work, please have them send that information to me and when its appropriate (probably after the snow melt) I would like to arrange a site visit to look at the water crossings.

Thank you for the opportunity to comment.

Scott
