To whom it may concern,

WSDOT Aviation Division originally commented on the aforementioned project with concerns about potential increases to wildlife habit and or activity. After consultation with David Ohl and Bryan Condon, we are satisfied that there will be no negative changes to wildlife activity and or habitat. In fact, this project may improve conditions so as to mitigate the impact wildlife may have on the airport. Therefore we do not have any concerns about this project.

Feel free to contact me if you have further concerns or questions.
