RE: Fielder Variance Application (VA-20-00014) – Response to Comments

Parcel No.: 486835

This letter is to respond to the comments by:

- Washington Department of F&W – Scott Downs; February 10th, 2021
- Kittitas County Public Health – Holly Erdman; February 16th, 2021
- Department of Archaeology & Historic Preservation – Sydney Hanson; February 16th, 2021

In response to Fish and Wildlife a note will be added to the site plan when submitting for a building permit, "The current setback shown on our site plan will be maintained from Lake Kachess and its riparian area and will not be modified if further iterations are needed to the proposed structure."

As there are no comments from the health department at this time there are no responses necessary.

Per the request of the department of Archaeology and Historic Preservation an inadvertent discovery plan (IDP) will be included with our application for building permit so that all contractors, sub-contractors and consultants are aware of the possibility for cultural resource discovery during ground disturbing activities.

Please review the responses to the comments provided and if further clarifications are required please let me know.

Sincerely,

Jayne Zold
