- Water
- Schools
- Camps and Parks
- Food
- Pools
- Vector
- Nuisance/complaints
- Solid Waste
- EH Data 2004

**KITTITAS COUNTY PUBLIC HEALTH DEPARTMENT**  
**2<sup>nd</sup> QUARTER 2004**  
**April 1 – June 30, 2004**

**I. Comments from the Health Officer: Dr. Rosalie Miller**

- ◆ The bulk of time in the month of April has been devoted to:
  - TB case in previously homeless male with 12 contacts and a total of 8 individuals requiring treatment and all requiring ongoing monitoring. Timeline for treatment can be 6 - 9 months, pending final culture reports. TB is a very hardy, slow growing organism - multiple drugs are used until we obtain final information about which drugs will effectively kill the organism (drug sensitivities).
  - Suspect TB case is being evaluated with a total of 16 contacts and one individual requiring treatment, so far.
  - Attended a TB conference to update clinicians on current diagnosis and treatment of TB on April 22 and 23, 2004.

**II. Administrator’s Report: Nancy Goodloe, Ed. D., CHES**

**Departmental:**

**Professional Activity:**

**4th Quarter Highlights:**

**Health Promotion –**

**Community Health Services**

**Environmental Health**

**III. Administrative Support Staff and Vital Records: Nora Ludlow, -- Administrative Assistant**

**Vital Records - Statistics**

\*Total of client contacts per quarter.

#### ◆ Description of terms in the above table:

- **Second Contact** – This is a 15 to 30 minute appointment that involves education regarding the risk factors of the client. It often involves a HCT, and also includes a weight for PG women.
- **Complete Certification** – This is a 60-minute appointment that involves verifying all of the qualifying factors for WIC. It also provides education of the risk factors (medical and non-medical) that make the person qualify for WIC.
- **Classes** – The classes that we currently offer are: Breastfeeding: an Overview, Benefits of Breastfeeding, How to Breastfeed, Pumping and Storing Breastmilk, and a variety of Healthy Habits classes for kids.
- **Check pick up** – This is a 15 minute appointment where the client comes in to get checks, and notifies us of any changes or new concerns that they may have.
- **Enroll infant** – This is a brief appointment or phone call where we add a new baby to a family already on WIC. This allows us to get the baby started on the program, as well as to issue checks for formula if they are needed.
- **Follow up** – This is a 15-minute appointment where a single risk factor is discussed. It may also be just a weight check for the pregnant woman.
- **Health Assessment** – This is a 30-minute appointment when a 5 to 7 month old infant is weighed, measured and the diet is checked. We also address any other risk factors that the infant may have.
- **Letter sent** – This is a form letter that is sent out to our client when they miss an appointment.

- **New Certification** – This is a 60-minute appointment for the client that has no prior history in our clinic. Basically, it is a Complete Certification with the addition of verifying basic demographics and family information.
- **Presume Eligible** – This is for the pregnant client that is beginning our program. For this appointment, she needs to bring in proof of pregnancy and photo ID. We are then able to issue her one-month checks and make an appointment to have a Complete Certification.
- **Recertification** – This is a 30-minute appointment for the client that has been certified before, but whose Certification has expired. Certifications last one year for infants, six months for children up to age five, and until six weeks postpartum for pregnant woman. For breastfeeding women, the Certification last six month, and she may be Recertified until the baby is 1 year old.
- **High Risk (Registered Dietician)** – This is a 45-minute appointment with our Registered Dietician for high-risk clients who need special consultation.
- **Reinstate** – This is the process of reopening a file for someone that has been terminated, but still has a current certification.
- **Transfer In** – This is a 15-minute appointment that involves opening a file for a client that has been on WIC with another agency.
- **Terminate** – This is the process of closing a file for someone that is no longer eligible for WIC. In the case of children, it would be because they have had their fifth birthday, or no longer need the WIC qualifications. In the case of women, it would be because they are no longer PG and not breastfeeding, or they have breastfed for more than one year. Clients can also be terminated for non-compliance, or for not coming to their appointments.
  - **Transfer Out** – This is done for the client that is moving to another WIC office. This process gives them a card that they take with them to the new office, so that they do not have to begin at the very beginning again.

◆ **Oral Health Access Program: Christie Waddington, Coordinator**

**Mission Statement: Oral Health Access for Kittitas County is a program designed to enhance access to dental services for children, low income residents, and other underserved groups and raise the awareness of oral health care in the community.**

**Goal 1: Build Infrastructure in Kittitas County around Access to Oral Health**

**Public Health Standards Met: ACL3.2.1, ACL 3.5.2 PPL5.1.1, PPL3.6.2, PPL4.7.4**

•

**Goal 2: Support Population Based Oral Health Services.**

**Public Health Standards Met: PPL5.1.1, PPL4.5.3, PPL3.5.3**

**Oral Health Education Component:**

**Coordination of Mobile Dental units:**

•

**School Sealants Programs:**

•

**Goal 3: Increase Access to Oral Health Care in Kittitas County**

•

**Client Demographics - 2004**
