ON SITE SEWAGE INSTALLATION PERMIT APPLICATION

A "Permit to Install a Sewage System" allows the Landowner to install or to contract a licensed OSS installer to install an on-site septic system according to the design approved by the Health Officer. Development other than that described on the permit application and approved design, may without advanced approval of the Health Officer invalidate the Permit.

A sewage system installation permit expires one year from the month of issuance, and must be complete before final inspection.

A one-year renewal permit may be applied for prior to expiration.

It is the responsibility of the requesting party to have established boundary lines prior to any work being conducted on the parcel.
