 Location: Various

Intersection & Corridor Safety Improvements

Project Number: RC2196-HS

Length: TBD

Basis for Project: Safety Improvements/Countermeasures

Construction: 2022-2023

Project Description:

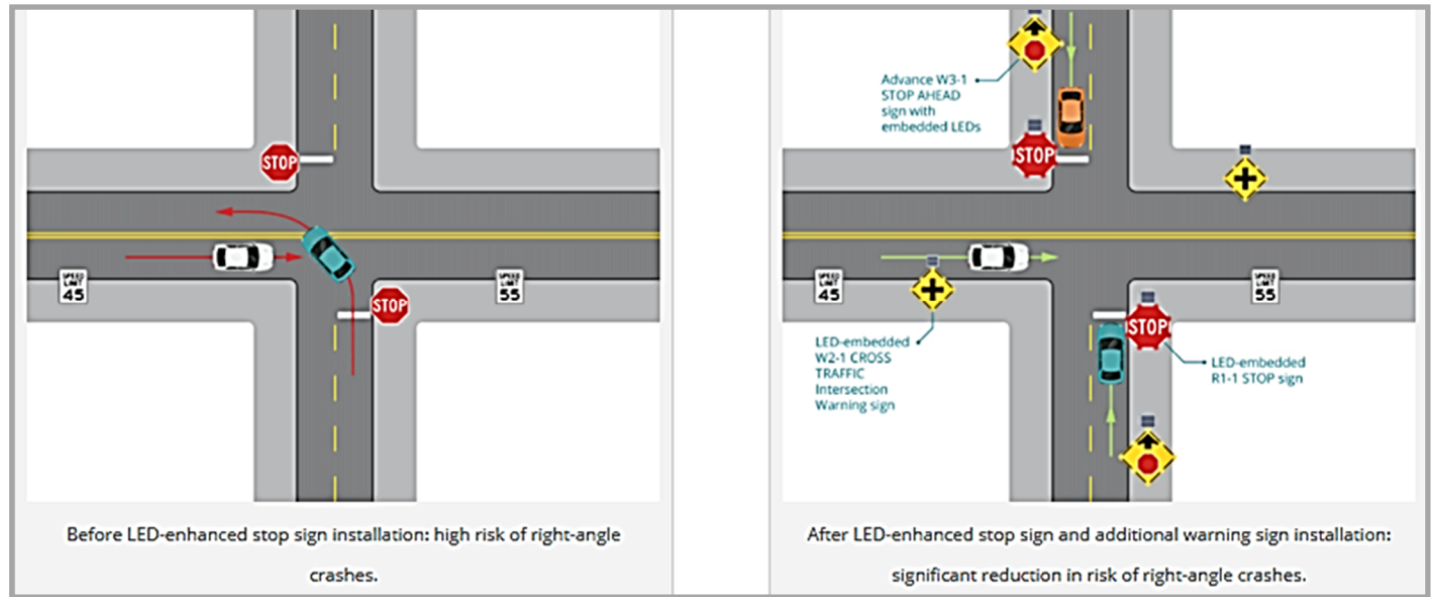

This project provides corridor and intersection countermeasures and improvements at unsignalized intersections and road segments identified as having insufficient, “out of date”, or non-effective safety measures based on accident data analysis and safety studies. Kittitas County recognizes that improvements to these corridors may provide benefit to a great number of local residents, recreational travelers, and freight transit; and, any improvements that could reduce potential future crashes are beneficial.

Status: Completed

Traffic Impacts: N/A

Funding Source:

HSIP	\$566,000
Local funding	\$0
Total:	\$566,000

Depiction of current County rural intersection (left) and a proposed County rural intersection with improvements (right).
